ZERO TO HERO
PIANO COURSE

TABLE OF CONTENTS

1 **MODULE 1 - INTRODUCTION** 1

2 **MODULE 2** 4

2A	Best posture for pianists	5
2B	Everything about SARGAM & Alankars	7
2C	Playing first song on piano	11
2D	Sargam v/s western notes. Which is easy?	12
2E	Top #4 right hand exercises	14
2F	Learning the concept of rhythm (Note values)	16
2G	How to play in rhythm?	20
2H	Mastering songs on piano	25
2I	After this, you will master rhythm	57
2J	Final stage: Mastering right hand	59

3 **MODULE 3** 62

3A	Major scales formula & circle of fifth	63
3B	Minor scales formula	72
3C	Learn chords & its formation	78
3D	What are chord inversion?	90
3E	Types of chords (Maj7, Dom7, Aug, Dim, Sus)	94
3F	Types of scales (Harmonic, Melodic, Pentatonic)	103
3G	Relative major & minors	108

4

MODULE 4 ..... **111**

4A	Learn how to shift chords	112
4B	Challenge yourself (chords shifting test)	114
4C	More challenging (chords shifting test 2)	116
4D	5 best exercises for changing chords	117
4E	4 lessons to play chords on correct time	120
4F	Advanced exercises for chords coordination	123
4G	RCCR framework to play songs with chords	125
4H	Become a master of playing songs with chords	133
4I	Learn advanced chords	172

5

MODULE 5 ..... **175**

5A	5 exercises to make left hand powerful	176
5B	Advanced left hand exercises	179
5C	Establishing two hands coordination	181
5D	What should be your daily practice routine?	186
5E	Master playing with both hands	188
5F	My favourite twister exercise	192

6

MODULE 6 ..... **193**

6A	Introduction to arpeggios	194
6B	Arpeggio coordination exercises (4x4) – Part 1	195
6C	Arpeggio coordination exercises (3x4) – Part 2	198
6D	4 step process to play songs with arpeggios	200
6E	My 7 universal arpeggio patterns (4x4)	203
6F	Some exceptional arpeggio patterns	206
6G	My 4 universal arpeggio patterns (3x4)	209
6H	How to identify patterns for your favourite songs?	211
6I	Building your own arpeggio pattern	213
6J	How to improvise with arpeggios	216

MODULE 7 ..... **219**

7A	Ear training: Play any song by ear	220

MODULE 8 ..... **225**

8A	How to find scale of songs?	226
8B	Major scale or minor scale: How to identify?	228
8C	Learning chord families	229
8D	How to find chords of songs by ear?	232
8E	Learning priority chords (major & minor progressions)	234

MODULE 9 ..... **238**

9A	How to use touch sensitive function?	239
9B	How to use fillers in songs?	241
9C	How to use harmonies in songs?	243
9D	Understanding the functions: Layering, Splitting, Rhythm tracks	245
9E	How to use sustain pedal?	247

MODULE 10 ..... **248**

10A	What to play on piano with singer?	249
10B	How to make your own intro & outro music?	251
10C	How to transpose the scales & learn facial expressions	254

CONCLUSION **257**

INTRODUCTION

Are you ready to dive into the magical world of piano playing? Look no further than "Zero to Hero Piano Course" by Jash Gotawala. This extraordinary book is your ticket to becoming a true piano virtuoso.

"0 to Hero Piano Course" is a comprehensive guide that covers every aspect of piano playing. With its 360-degree approach, this book leaves no stone unturned when it comes to mastering the piano.

Within the pages of this incredible course, I take you on a musical journey like no other. With 9 core topics serving as the foundation, you'll explore chords, scales, rhythm, music theory, and so much more. Each module builds upon the previous one, ensuring a seamless learning experience.

But wait, there's more! Each module is filled with chapters and lessons that focus on specific areas of piano playing. From finger exercises that improve your dexterity to ear training techniques that enhance your musicality, from classical compositions that showcase your skills to creating your own beautiful melodies, this course covers it all.

The key to success lies in following the course step by step. By diligently completing the exercises and lessons in the prescribed order, you'll develop a rock-solid foundation and achieve fluency, smoothness, and effortless playing.

Once you've completed "0 to Hero Piano Course," you'll possess all the knowledge and skills necessary to confidently play the piano. You'll be able to approach any piece of music with ease

and grace, infusing your own unique style into every note you play.

So, if you're ready to embark on this incredible musical journey, grab a copy of "0 to Hero Piano Course" by Jash Gotawala. Unleash your inner maestro and let the music flow through your fingertips!

The video course version of this course is available on www.pixseries.com/courses

The course is also available on play store and app store. You need to download the application ‘PIX Series’. This application will allow you to purchase the video course and watch it offline too.

MODULE 2

Chapter 2A

Best posture for pianists

Sitting posture is a very important part of playing piano as it helps us in long-hour practice.

There are 2 things which we need to keep in mind for the best posture.

1. Level of piano.
2. Angle of hands.

Level of piano:

When we sit on chair to play piano, we need to make sure that our piano should be at the level of our belly button. This is a perfect point where the angles of our hand will be perfect. If the piano is above the level of belly button then we might face pain in our wrist as the hand and wrist level changes and if it is too low then we may feel little uncomfortable. Always make sure to have piano exactly to the level of our belly button.

Angle of hands:

Angle of our hands matters a lot when it comes to playing piano because if the angle is wrong it affect the duration of practice as we will not be able to play for long duration.

So, the perfect angle of hands while playing piano is 90°. This is an angle where our hands are in such a position where we can easily play piano from all octaves comfortably.

Which chair should we use when playing piano?

The simple answer is any chair which does not have fixed hands. If the chair has fixed hands, we will not be able to play the keys of extreme ends. Always prefer a chair which has either adjustable hands or no hands. There is one more thing to make sure while choosing a chair and that is if it is a wheel chair make sure to get a heavy quality chair and the reason for that is if the chair is of low quality, it will not be a steady chair. Unsteady chair is a distraction because it will also make our hands and body unsteady. So use a steady chair for ease of learning and playing.

Chapter 2B

Everything about SARGAM & ALANKARS

Before learning about SARGAM or ALANKARS, let us learn about the keys and octaves of piano.

There are group of 2 black keys and 3 black keys in a keyboard.

There are white keys too.

So number of keys between two similar keys is called an octave.

There are total of 12 keys in a keyboard and there are minimum 3 octaves in a keyboard.

1. Lower Octave
2. Middle Octave
3. Higher Octave

If you have a 61 keys keyboard then there are total of 5 octaves in a keyboard and if you have an 88 keys keyboard then there are total of 7 octaves.

Now let us learn about SARGAM.

What is SARGAM?

SARGAM is a set of musical notes which are often used in Indian classical music. We are very familiar with the words like SA, RE, GA, MA, PA, DHA, NI right? These words/notes are called SARGAM. There are total 12 notes in a SARGAM.

1. SA
2. RE
3. GA
4. MA
5. PA
6. DHA
7. NI
8. RE komal
9. GA komal
10. Dha komal
11. NI komal
12. MA tivra

These are musical notes which if played in a certain sequence will sound melodious.

Now, let us learn the full form of these notes.

SA - Shadja	PA – Pancham
RE - Rishabh	DHA – Dhaivat
GA - Gandhar	NI – Nishad
MA - Madhyam	

Now, what are the finger positions to play SARGAM from ‘kali ek’.

SA – Index finger	PA – Middle finger
RE – Middle finger	DHA – Ring finger
GA - Thumb	NI – Thumb
MA – Index finger	SA – Index finger

What are Alankaras?

Alankaras are basically exercises which are designed in sargam format to make your finger movement fluent.

ALANKARAS:

1. SA RE GA MA PA DHA NI SA.

   SA NI DHA PA MA GA RE SA

2. [SA RE] [RE GA] [GA MA] [MA PA] [PA DHA] [DHA NI] [NI SA]

   [SA NI] [NI DHA] [DHA PA] [PA MA] [MA GA] [GA RE] [RE SA]

3. [SA RE GA] [RE GA MA] [GA MA PA]
   [MA PA DHA] [PA DHA NI] [DHA NI SA]

   [SA NI DHA] [NI DH PA] [DHA PA MA]
   [PA MA GA] [MA GA RE] [GA RE SA]

4. [SA RE GA MA RE] [RE GA MA PA GA] [GA MA PA DHA MA] [MA PA DHA NI PA] [PA DHA NI SA]

   [SA NI DHA PA NI] [NI DHA PA MA DHA] [DHA PA MA GA PA] [PA MA GA RE MA] [MA GA RE SA]

5. [SA RE GA MA PA MA GA RE] [RE GA MA PA DHA PA MA GA] [GA MA PA DHA NI DHA PA MA] [MA PA DHA NI SA NI DHA PA]

   [SA NI DHA PA MA PA DHA NI] [NI DHA PA MA GA MA PA DHA] [DHA PA MA GA RE GA MA PA] [PA MA GA RE SA RE GA MA]

All these alankaras are to be played on metronome to develop rhythm sense.

Metronome:		
Alankar	Beats	Tempo
1	4	80 – 150
2	4	80 – 150
3	3	80 – 150
4	4	80 – 150

Chapter 2C

Playing first song on piano

Today we will learn how to play Happy Birthday song on piano.

Full Notations:

1 2 3 4 1 2 3 4

Happy birthday to you

SA SA RE SA MA GA

1 2 3 4 1 2 3 4

Happy birthday to you

SA SA RE SA PA MA

1 2 3 4 1 2 3 4

Happy birthday dear Jash

SA SA DHA PA MA GA RE

1 2 3 4 1 2 3 4

Happy birthday to you

MA MA GA SA RE SA

Metronome speed: 70 – 120.

Chapter 2D

Sargam v/s Western notes. Which is easy?

First of all Let us understand what western notes are. You might have seen ‘C#, C, F, Bb’. These type of notes are called western notes. In SARGAM format we call the keys by the name of SA, RE, GA, MA and in western we call it by the name of C, D, E, F, G.

What is the difference between these two formats?

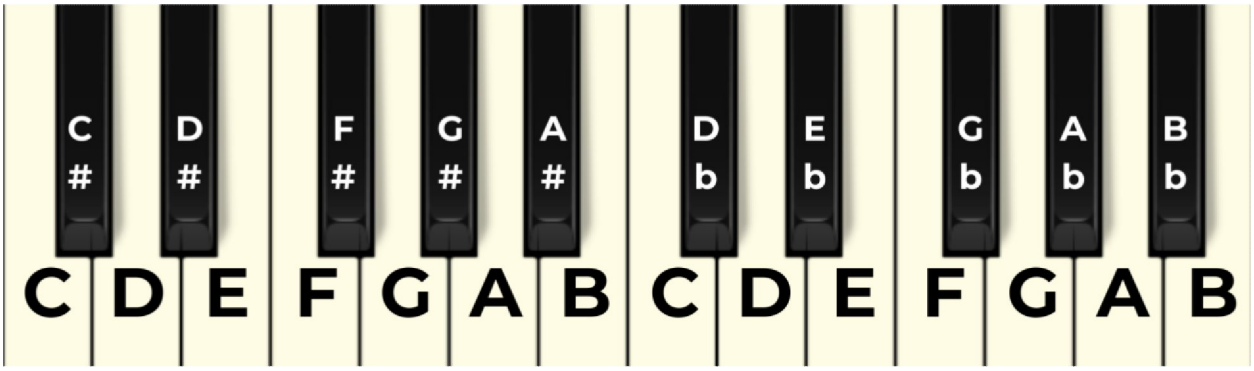

In SARGAM format the names of key are variable that means you can make any key ‘SA’ and you can play ‘SA, RE, GA, MA’ from any key in the keyboard. You just need to understand the gap between SA and RE and then you can play it from any key whereas in western notes the names of keys are definite. You cannot make any key ‘C’. In western notes the names of the keys are definite. So if you want somebody to play the first key of keyboard you just need to mention its name and they will play it but in SARGAM first you need to mention the scale then they will come to know which note is to be played.

Now, the question arises, what are scales? Don’t worry we will learn that in very detail in next module. Till then just practice the lesson and in just few more lessons you will be clear about it.

To summarize the lesson, Western notes are comparatively easy for beginners as there are only 12 notes to be remembered and will always be.

Western Notation chart

This chart is with sharp (#) & flat (b) notes

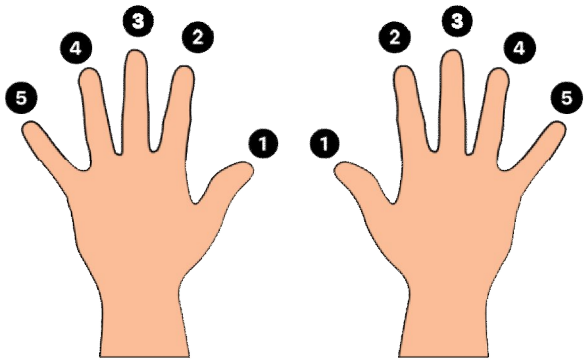

Chapter 2E

Top #4 right hand exercises

Before learning exercises, let us learn the finger positions. The chart displayed below shows the exact numbers for fingers. This numbers will remain the same throughout the piano journey.

Finger Position Chart

Top #4 Exercises

1. C E G E C E F G
   D F A F D F G A
   E G B G E G A B
   F A C A F A B C
   G B D B G B C D
   A C E C A C D E
   B D F D B D E F
   C E G E C E F G

Finger position: 1 3 5 3 1 3 4 5

2. C E C F G D E C
   D F D G A E F D
   E G E A B F G E
   F A F B C G A F
   G B G C D A B G
   A C A D E B C A
   B D B E F C D B
   C E C F G D E C

Finger position: 1 3 1 4 5 2 3 1

3. G C G D G E G F
   A D A E A F A G
   B E B F B GB A
   C F C G C A C B
   D G D A D B D C
   E A E B E C E D
   F B F C F D F E
   G C G D G E G F

Finger position: 5 1 5 2 5 3 5 4

4. E C G F E D
   F D A G F E
   G E B A G F
   A FC B A G
   B G D C B A
   C A E D C B
   D B F E D C
   E C G F E D

Finger position: 3 1 5 4 3 2

Lesson: All the exercises are to be played comfortably

Chapter 2F

Learning the concept of rhythm (Note value)

There are 4 note value which we will learn today. These note values are the pillars of rhythm as this will help you develop the sense of rhythm and will help you play in rhythm

1. Whole note
2. Half note
3. Quarter note
4. Eight note

There are more notes values but for now we only need these 4 note values.

Now, let us understand what the exact meaning of it is.

Whole Note:

In whole note there is only 1 sound in a bar. What is bar? Bar is the total number of counts in a rhythm loop. If there are 4 beats then 1 2 3 4 is a bar.

Now, we will use our clap as a sound. To practice whole note we will clap once in a bar.

Eg: 1 2 3 4

*

'*' refers to the clap.

So we need to clap when the 1st beat comes and then pause for the next 3 beats and then again clap on the 1st beat.

Right now we are using clap as a sound then instead of claps we will play a note.

Half Note:

In Half note there are 2 sounds in a bar.

Now, we will use our clap as a sound. To practice half note we will clap twice in a bar.

Eg: 1 2 3 4

* *

'*' refers to the clap.

So we need to clap when the 1st beat comes and then on the 3rd beat then again clap on the 1st beat.

Right now we are using clap as a sound after practicing this we will play a note.

Quater Note:

In Quarter note there are 4 sounds in a bar.

Now, we will use our clap as a sound. To practice half note we will clap four times in a bar.

Eg: 1 2 3 4

* * * *

'*' refers to the clap.

So we need to clap on all the beats. Right now we are using clap as a sound after practicing this we will play a note.

Eight Note:

In eight note there are 8 sounds in a bar.

Now, we will use our clap as a sound. To practice eight note we will clap 8 times in a bar.

Eg: 1 2 3 4

* * * * * * * *

'*' refers to the clap.

So we need to clap twice on the 1st beat and so on

Right now we are using clap as a sound after practicing this we will play a note.

We are using 4x4 time signature for this lesson to develop the rhythm sense.

Metronome set	
Whole note	110 – 200
Half note	90 – 180
Quarter note	80 – 170
Eight note	60 – 140

Lesson: After completing clapping on this metronome set we will play any random note on keyboard in the same format.

Note: Here, playing a note on keyboard is more important than clapping. So complete the lesson with a note and then move to the next lesson.

Chapter 2G

How to play in rhythm?

For this lesson we will use the exercises of chapter 2E and concept & metronome set of chapter 2F.

Now, the exercises which we have learned in chapter 2E has to be played on metronome in 4 formats. Whole note, half note, quarter note, eight note.

Just the way we played any random note on piano in these 4 formats, now we will play the notes of the exercises in these 4 formats.

Here is how it should sound.

Note: Here, 1 2 3 4 represents the beat count of metronome.

1. **Whole note format:**

   1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
   C E G E C E F G

   1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
   D F A F D F G A

   1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
   E G B G E G A B

1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
F A C A F A B C

1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
G B D B G B C D

1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
A C E C A C D E

1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
B D F D B D E F

1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
C E G E C E F G

2. Half note format:

1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
C E G E C E F G

1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
D F A F D F G A

1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
E G B G E G A B

1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
F A C A F A B C

1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
G B D B G B C D

1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
A C E C A C D E

1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
B D F D B D E F

1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4
C E G E C E F G

3. Quarter note format:

1 2 3 4 1 2 3 4
C E G E C E F G

1 2 3 4 1 2 3 4
D F A F D F G A

1 2 3 4 1 2 3 4
E G B G E G A B

1 2 3 4 1 2 3 4
F A C A F A B C

1 2 3 4 1 2 3 4
G B D B G B C D

1 2 3 4 1 2 3 4
A C E C A C D E

1 2 3 4 1 2 3 4
B D F D B D E F

1 2 3 4 1 2 3 4
C E G E C E F G

4. Eight note format:

1 2 3 4
C E G E C E F G

1 2 3 4
D F A F D F G A

1 2 3 4
E G B G E G A B

1 2 3 4
F A C A F A B C

1 2 3 4
G B D B G B C D

1 2 3 4
A C E C A C D E

1 2 3 4
B D F D B D E F

1 2 3 4
C E G E C E F G

This is just 1st exercise in all 4 formats. We need to complete first 3 exercises in all 4 formats and last exercise in quarter note and eight note format. Metronome set should remain same as the previous chapter.

Metronome set for exercises:

Exercise 1, 2, 3	
Whole note	110 – 200
Half note	90 – 180
Quarter note	80 – 170
Eight note	60 – 140

Exercise 4	
Quarter note	80 – 170
Eight note	60 – 140

Note: Here 4th exercise is in 3x4 time signature. So when playing 4th exercise make sure to have 3 beat setting in metronome.

Chapter 2I

After this, you will master rhythm!

In this Chapter we will discuss about what is that you need to know when it comes to rhythm. Rhythm is a very simple concept if you know what speed is. Rhythm refers to a regular repeated pattern of sound or movement.

When you are listening to a song, have you observed the speed of the song? Some songs are in high speed and some have low speed. Catching that speed is what rhythm is all about.

Here is how you can do that.

1. Pick a song
2. Start counting when the beat starts.

Now, when the beat starts you will notice that it will repeat after some seconds. So you need to count the numbers till the beat repeats. You will find the speed of that and now you will be able to count with the song.

When you keep practicing this with every song you hear you will develop a subconscious habit of identifying the rhythm of the song.

Lesson: From now onwards whenever you listen to a song you need to count with that song and clap/snap along with it.

Chapter 2J

Final stage: Mastering right hand

In this lesson we will learn 3 exercises which will help you open up your fingers even more and make it fluent.

Note: Every note you see below has to be played in two octaves with right hand.

For eg: C D E F G F E D

Now, C note has to be played in 3rd octave and 4th octave together with your right hand.

Fingers to be used: C(3rd octave – Thumb/1st finger) C(4th octave – Little finger/5th finger)

Exercise 1:

C D E F G F E D

D E F G A G F E

E F G A B A G F

F G A B C B A G

G A B C D C B A

A B C D E D C B

B C D E F E D C

C D E F G F E D

Exercise 2:

C# D# F# G# A# G# F# D#

D# F# G# A# C# A# G# F#

F# G# A# C# D# C# A# G#

G# A# C# D# F# D# C# A#

A# C# D# F# G# F# D# C#

C# D# F# G# A# G# F# D#

Note: The notes given below in brackets have to be played together.

For Eg: (CE), these two notes have to be played together in right hand.

Finger positions: (1 3)

Exercise 3:

(CE) (DF) (CE)

(DF) (EG) (DF)

(EG) (FA) (EG)

(FA) (GB) (FA)

(GB) (AC) (GB)

(AC) (BD) (AC)

(BD) (CE) (BD)

Finger position: (13) (24) (13)

Metronome Speed (Quarter note format)	
Exercise 1	80 – 130
Exercise 2	70 – 110
Exercise 3	100 – 160

MODULE 3

Chapter 3A

Major scales formula & circle of fifth

What are scales?

A scale is an ordered sequence of notes. It is a set of notes to for a song.

When you will play major scale you will hear the sound of SA, RE, GA, MA, PA, DHA, NI, SA.

Scales are used in many musical concepts like CHORDS, ARPEGGIOS, EAR TRAINING, CHORD IDENTIFICATION etc. Learning scale will help you boost your learning process.

MAKE SURE TO UNDERSTAND THIS CONCEPT VERY CLEARLY.

Let us now learn the formula of scales.

Before that we need to learn two terms

1. Semi tone/Half step
2. Tone/Whole step

What is semi tone/half step?

Semi tone is just next key of any played key.

Example: Suppose you play ‘C’ note. Now, semi tone of C is C#. Just next key of C is C# and not D.

Semi tone of ‘E’ is ‘F’

What is tone/whole step?

Tone is next to next key of any played key.

Example: Suppose you play ‘C’ note. Now, tone of ‘C’ note is D.

Next to next key of ‘C’ is D.

Tone of ‘B’ note is ‘C#’ note.

You can also remember it in this way.

2 semi tones = 1 tone.

Major scale formula:

- T T ST T T T ST

1. ‘-‘ = Root note
2. ‘T’ = Tone
3. ‘ST’ = Semi tone

So now, if we put any scale in this formula we will find the notes of a major scale.

Example: C major scale

Formula: - T T ST T T T ST

Notes: C D E F G A B C

Here, Root note of C major scale is ‘C’ note.

Remember, the scale you want to find is the root note.

If you want to find G# major scale then root note of the scale will be ‘G#’ note.

Now, Tone of ‘C’ is ‘D’. Tone of ‘D’ is ‘E’. Semi tone of ‘E’ is ‘F’ and it goes on till you reach the last note of scale.

Let us now test ourselves.

1. C major scale

   Formula: - T T ST T T T ST

   Notes: _____

2. C# major scale

   Formula: - T T ST T T T ST

   Notes: _____

3. D major scale

   Formula: - T T ST T T T ST

   Notes: _____

4. D# major scale

   Formula: - T T ST T T T ST

   Notes: _____

5. E major scale

   Formula: - T T ST T T T ST

   Notes: _____

6. F major scale

   Formula: - T T ST T T T ST

   Notes: _____

7. F# major scale

   Formula: - T T ST T T T ST

   Notes: _____

8. G major scale

   Formula: - T T ST T T T ST

   Notes: _____

9. G# major scale

   Formula: - T T ST T T T ST

   Notes: _____

10. A major scale

    Formula: - T T ST T T T ST

    Notes: _____

11. A# major scale

    Formula: - T T ST T T T ST

    Notes: _____

12. B major scale

    Formula: - T T ST T T T ST

    Notes: _____

Answer key:

C MAJOR SCALE

Notes: C, D, E, F, G, A, B, C

Fingering (LH): 5, 4, 3, 2, 1, 3, 2, 1

Fingering (RH): 1, 2, 3, 1, 2, 3, 4, 5

D MAJOR SCALE

Notes: D, E, F#, G, A, B, C#, D

Fingering (LH): 5, 4, 3, 2, 1, 3, 2, 1

Fingering (RH): 1, 2, 3, 1, 2, 3, 4, 5

E MAJOR SCALE

Notes: E, F#, G#, A, B, C#, D#, E

Fingering (LH): 5, 4, 3, 2, 1, 3, 2, 1

Fingering (RH): 1, 2, 3, 1, 2, 3, 4, 5

F MAJOR SCALE

Notes: F, G, A, Bb, C, D, E, F

Fingering (LH): 5, 4, 3, 2, 1, 3, 2, 1

Fingering (RH): 1, 2, 3, 4, 1, 2, 3, 4

G MAJOR SCALE

Notes: G, A, B, C, D, E, F#, G
Fingering (LH): 5, 4, 3, 2, 1, 3, 2, 1
Fingering (RH): 1, 2, 3, 1, 2, 3, 4, 5

A MAJOR SCALE

Notes: A, B, C#, D, E, F#, G#, A
Fingering (LH): 5, 4, 3, 2, 1, 3, 2, 1
Fingering (RH): 1, 2, 3, 1, 2, 3, 4, 5

B MAJOR SCALE

Notes: B, C#, D#, E, F#, G#, A#, B
Fingering (LH): 4, 3, 2, 1, 4, 3, 2, 1
Fingering (RH): 1, 2, 3, 1, 2, 3, 4, 5

C#/Db MAJOR SCALE

Notes: Db, Eb, F, Gb, Ab, Bb, C, Db
Fingering (LH): 3, 2, 1, 4, 3, 2, 1, 3
Fingering (RH): 2, 3, 1, 2, 3, 4, 1, 2

D#/Eb MAJOR SCALE

Notes: Eb, F, G, Ab, Bb, C, D, Eb
Fingering (LH): 3, 2, 1, 4, 3, 2, 1, 3
Fingering (RH): 3, 1, 2, 3, 4, 1, 2, 3

F#/Gb MAJOR SCALE

Notes: F#, G#, A#, B, C#, D#, F, F#

Fingering (LH): 4, 3, 2, 1, 3, 2, 1, 4

Fingering (RH): 2, 3, 4, 1, 2, 3, 1, 2

G#/Ab MAJOR SCALE

Notes: Ab, Bb, C, Db, Eb, F, G, Ab

Fingering (LH): 3, 2, 1, 4, 3, 2, 1, 3

Fingering (RH): 3, 4, 1, 2, 3, 1, 2, 3

A#/Bb MAJOR SCALE

Notes: Bb, C, D, Eb, F, G, A, Bb

Fingering (LH): 3, 2, 1, 4, 3, 2, 1, 3

Fingering (RH): 4, 1, 2, 3, 1, 2, 3, 4

All the scales are to be played in circle of fifth order.

What is circle of fifth?

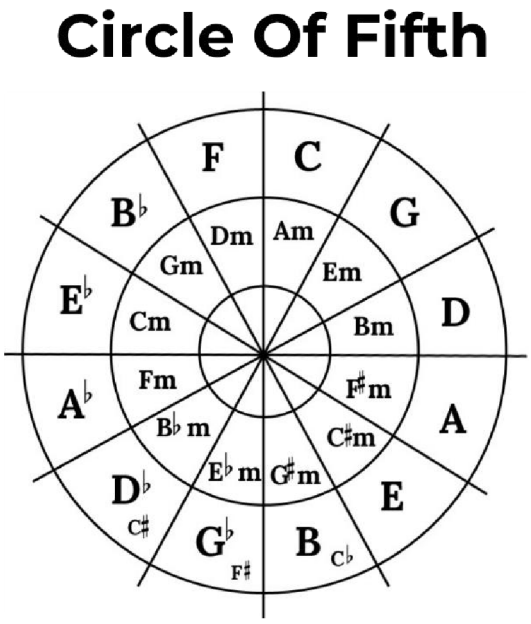

Circle of fifth is sequence of scales in ascending order of black keys. As we move to next scale of the circle, the number of back key increases.

How to understand the circle?

The circle starts with C which has no black keys.

Now, what is the 5th note of C scale? The answer is G.

So, next scale of circle is G and it goes on.

Metronome set:

Format: Eight note

Tempo/BPM: 80 – 110

Chapter 3B

Minor scales formula

Minor scale formula:

- T ST T T ST T T

4. ‘-‘ = Root note
5. ‘T’ = Tone
6. ‘ST’ = Semi tone

So now, if we put any scale in this formula we will find the notes of a major scale.

Example: **Cm major scale**

Formula: - T T ST T T T ST

Notes: C D D# F G G# A# C

Here, Root note of C minor scale is ‘C’ note.

Remember, the scale you want to find is the root note.

If you want to find A# minor scale then root note of the scale will be ‘A#’ note.

Now, Tone of ‘C’ is ‘D’. Semi tone of ‘D’ is ‘D#’. Tone of ‘D#’ is ‘F’ and it goes on till you reach the last note of scale.

Let us now test ourselves.

1. C minor scale

   Formula: - T T ST T T T ST

   Notes: _____

2. C# minor scale

   Formula: - T T ST T T T ST

   Notes: _____

3. D minor scale

   Formula: - T T ST T T T ST

   Notes: _____

4. D# minor scale

   Formula: - T T ST T T T ST

   Notes: _____

5. E minor scale

   Formula: - T T ST T T T ST

   Notes: _____

6. F minor scale

   Formula: - T T ST T T T ST

   Notes: _____

7. F# minor scale

   Formula: - T T ST T T T ST

   Notes: _____

8. G minor scale

   Formula: - T T ST T T T ST

   Notes: _____

9. G# minor scale

   Formula: - T T ST T T T ST

   Notes: _____

10. A minor scale

Formula: - T T ST T T T ST

Notes: _____

11. A# minor scale

Formula: - T T ST T T T ST

Notes: _____

12. B minor scale

Formula: - T T ST T T T ST

Notes: _____

Answer Key

A MINOR SCALE

Notes: A, B, C, D, E, F, G, A

Fingering (LH): 5, 4, 3, 2, 1, 3, 2, 1

Fingering (RH): 1, 2, 3, 1, 2, 3, 4, 5

A#/Bb MINOR SCALE

Notes: A#, C, C#, D#, F, F#, G#, A#

Fingering (LH): 2, 1, 3, 2, 1, 4, 3, 2

Fingering (RH): 2, 1, 2, 3, 1, 2, 3, 4

B MINOR SCALE

Notes: B, C#, D, E, F#, G, A, B

Fingering (LH): 4, 3, 2, 1, 4, 3, 2, 1

Fingering (RH): 1, 2, 3, 1, 2, 3, 4, 5

C MINOR SCALE

Notes: C, D, Eb, F, G, Ab, Bb, C

Fingering (LH): 5, 4, 3, 2, 1, 3, 2, 1

Fingering (RH): 1, 2, 3, 1, 2, 3, 4, 5

C#/Db MINOR SCALE

Notes: C#, D#, E, F#, G#, A, B, C#

Fingering (LH): 3, 2, 1, 4, 3, 2, 1, 3

Fingering (RH): 3, 4, 1, 2, 3, 1, 2, 3

D MINOR SCALE

Notes: D, E, F, G, A, Bb, C, D

Fingering (LH): 5, 4, 3, 2, 1, 3, 2, 1

Fingering (RH): 1, 2, 3, 1, 2, 3, 4, 5

D#/Db MINOR SCALE

Notes: D#, F, F#, G#, A#, B, C#, D#

Fingering (LH): 2, 1, 4, 3, 2, 1, 3, 2

Fingering (RH): 3, 1, 2, 3, 4, 1, 2, 3

E MINOR SCALE

Notes: E, F#, G, A, B, C, D, E

Fingering (LH): 5, 4, 3, 2, 1, 3, 2, 1

Fingering (RH): 1, 2, 3, 1, 2, 3, 4, 5

Metronome set:

Format: Eight note

Tempo/BPM: 80 – 110

Chapter 3C

Learn chords & its formation

What is a chord?

Chord is a set of 3 note played together to support the lead/melody line of the song/music piece.

Why to learn chord?

Playing a song without chords makes the very raw and adding chords to it helps you enhance your music.

How the chords are formed?

There are two methods to form a chord.

1. Scale method
2. Tone-Semi tone method

Scale Method:

When you want to find notes of any chord, first we need to find the respective scale.

Example: C major chord – C major scale

Now, 1st note, 3rd note, 5th note of C major scale will be the C major chord.

C major chord

Scale notes – C D E F G A B C

Chord notes – C E G

This is how we can find the Major chords and Minor chords.

The same method can be followed for all major & minor chords.

Tone – Semi tone method:

In this method there are 2 formulas which can be used to find chords.

1. Major chord formula – Root note + 4 semitones + 3 semitones
2. Minor chord formula – Root note + 3 semitones + 4 semitones.

Examples:

D major chord

Root note of ‘D major chord’ will be ‘D’ note.

Adding 4 semitones to ‘D note’ gives ‘F#’ note.

Adding 3 semitones to ‘F# note’ give ‘A’ note.

D major chord – D F# A

D minor chord

Root note of ‘D minor chord’ will be ‘D’ note.

Adding 3 semitones to ‘D’ note gives us ‘F’ note.

Adding 4 semitones to ‘F’ note gives us ‘A’ note.

D minor chord – D F A

Chapter 3D

What are chord inversion?

Chord inversions are variations to chords which helps us to shift chords in an easy manner. Altering the sequence of notes in a chord is called inversion.

So far we have learnt about the notations of chords and here we are now where we will learning how can lay inversions of chords.

There are 2 inversions of a chord:

1. 1st inversion
2. 2nd inversion

How do we play that?

1st inversion: It changes the position of first note of the chord and shift the note to the next octave.

Example: C major chord – C E G

We play C E G in a sequence where the first note we press is C then E then G but in 1st inversion we will just change the sequence of notes.

1st inversion of C major chord – E G (C)

The first note played is E then G and C is now being played in the next octave

2nd Inversion: It changes the position of 3rd/last note a chord and shift it to a lower octave.

Example: C major chord – C E G

We play C E G in a sequence where the first note we press is C then E then G but in 2nd inversion we will just change the sequence of notes.

2nd inversion of C major chord – (G) C E

The first note played is G in the octave lower than C & E

Chapter 3E

Types of chords (m7, 7th, aug, dim, sus2, sus4)

There are more varieties to the chords apart from the major and the minor. Let us learn the different types of chords.

Formula for the types of chords

1. **Major seventh chord (m7):** block chord + 7th note of it's major scale.

   Example: C major 7th/Cm7 – C E G B
   D major 7th/Dm7 – D F# A C#

   Explanation: Here we have added B note because it is the 7th note of C major scale.

2. **Dominant seventh chord (^{7}):** Flatten the last key of Maj7 chord.

   Example: C^7 – C E G A#
   D^7 – D F# A C

   Explanation: Here we have added 'A#' note because if we minus 1 semitone from the last note of Maj7th chord that is 'B' note we get 'A#' note. So 'C E G B' becomes 'C E G A#'

3. **Augmented chord (aug):** Change the last key of block chord by adding one semitone to it.

   Exampe: C aug – C E G#
   D aug – D F# A#
   Explanation: Here, if we change the last note of C major chord that is ‘G’ and add one semitone to it, we get ‘G#’. Similarly, the notes of ‘D’ chord are D-F#-A but now if we add one semitone to ‘A’ note we get ‘A#’ note.

4. **Diminished chord (dim):** Root note + 3 semitones + 3 semitones.

   Example: Cdim – C D# F#
   Ddim – D F G#

   Explanation: Here, root note of any chord becomes the letter itself. Root note of ‘Cdim’ is ‘C’, ‘Ddim’ is ‘D’, ‘Edim’ is ‘E’. So the root note of ‘Cdim’ is ‘C’. Adding 3 semitones to ‘C’ gives ‘D#’. adding 3 semitones to ‘D#’ gives ‘F#’.

5. **Suspended chords:**
   a. **Sus2 chord (sus2):** Change the middle note of block chord with its scale’s second note.

      Example: Csus2 – C D G
      Dsus2 – D E A

      Explanation: Notes of ‘C major chord’ are ‘C-E-G’. Now, replacing the middle of chord that is ‘E’ and putting the second note of its scale (C scale) will give us ‘D’ note. Thus, notes are C-D-G.

b. **Sus4 chord (sus4):** Change the middle note of bock chord with its scale's fourth note.

Example: Csus4 – C F G
Dsus4 – D G A

Explanation: Notes of 'C major chord' are 'C-E-G'. Now, replacing the middle of chord that is 'E' and putting the fourth note of its scale (C scale) will give us 'F' note. Thus, notes are C-F-G.

Chapter 3F

Types of scales (Melodic, Harmonic, Pentatonic)

There are many other types of scales apart from the major and minor.

In this chapter we will learn about the 3 types of scales.

1. Harmonic Minor Scale
2. Melodic Minor Scale
3. Pentatonic Scale

There is a very easy trick to make these scales. You will only find it easy if you have mastered the major and the minor scale.

1. **Harmonic Minor Scale:** Change the 7th note of any minor scale by adding one semitone to it.

   Example: A harmonic minor: A, B, C, D, E, F, G#, A
   B harmonic minor: B, C#, D, E, F#, G, A#, B

   Explanation: Here in A minor scale all the notes are exact same as the normal minor scale except 7th note. It should be 'G' note but to make it a harmonic minor we have added one semitone to it which makes it 'G#' note.

2. **Melodic Minor Scale:** Change the 6th and 7th note of any minor scale by adding one semitone to both.

   Example: A melodic minor: A, B, C, D, E, F#, G#, A
   B melodic minor: B, C#, D, E, F#, G#, A#, B

   Explanation: Here in A minor scale all the notes are exact same as the normal minor scale except the 6th & 7th note. It should be 'F' & 'G' note but to make it a melodic minor we have added one semitone to it which makes it 'F#' & 'G#' note.

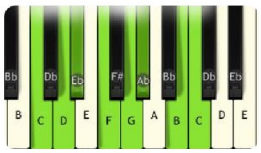

3. **Pentatonic Scale:** Eliminating the 4th note and 7th note from a major scale.

   Example: C Pentatonic: C, D, E, G, A, C
   D Pentatonic: D, E, F#, A, B D

   Explanation: Pentatonic scales only have 5 notes. So the major scales which consist 7 notes, by eliminating the 4th note and 7th note from it makes it a pentatonic scale.

Chapter 3G

Relative major & minors

What are relative major and minor?

Every relative major scale has a relative minor scale. This means that every major scale has one minor scale, the notes of both are similar. Similarly, every minor scale also has a relative major scale.

Example:

Relative minor of C major scale is A minor.

Now let us see if they have similar notes or not.

C major scale:

C, D, E, F, G, A, B, C

A minor scale:

A, B C, D, E, F, G, A

As you can see the unique notes are similar just the sequence has been changed.

There is a pair of relative major and minor.

Example: C major scale → A minor scale

A minor scale → C major scale

If relative minor of ‘C major’ is ‘A minor’ then relative major of ‘A minor’ will be ‘C major’.

How to find relative minor scales?

To find relative minor scale of major scale we need to find the 7th note of major scale and that will be the relative minor of any major scale.

Example: What will be the relative minor of D major scale?

D major scale – D, E, F#, G, A, B, C#, D

Now, 7th note of ‘D major’ scale is ‘B’ note.

So, relative minor of ‘D major’ scale is ‘B minor’ scale.

How to find relative major scales?

To find relative major scale of major scale we need to find the 3rd note of minor scale and that will be the relative major of any minor scale.

Example: What will be the relative major of B minor scale?

D major scale – B, C#, D, E, F#, G, A, B.

Now, 3rd note of ‘B minor’ scale is ‘D’ note.

So, relative minor of ‘B minor’ scale is ‘D major’ scale.

Similarly relative major and minor chords can be found.

Easy trick to find relative chords are:

Major → Minor

Replace the last note of any major chord by adding one tone to it.

Minor → Major

Replace the first note of any minor chord by subtracting one tone from it.

These chords are used as substitute chords. We can choose between these two chords and make music better.

MODULE 4

Chapter 4A

Learn how to shift chords

For chords shifting we need to practice the chords in progressions which will help us to increase the speed of shifting chords.

How to practice progression?

This chapter includes 4 progressions and 2 bonus progressions of chord. You will see a sequence of chords written below, you just need to play those chords in the written sequence with your both hands.

Progressions for major chords

1. C, G, D, A, E, B,
2. F#, F, A#, D#, G#, C#

Progressions for minor chords

1. Am, Em, Bm, F#m, C#m, G#m,
2. D#m, Dm, Gm, Cm, Fm, A#m,

Bonus progressions

1. C, G#, D#, B, C#, A, F#, D, G, E, A#, F
2. Bm, D#m, Am, Cm, A#m, C#m, Gm, Em, G#m, Dm, F#m, Fm

How to practice?

Just play all the chords of progression with two hands in a written sequence.

When you are comfortable, add metronome (4x4 time signature) and play each chord 4 times on the 4 counts of metronome.

Metronome Speed: 80 – 120

Level 1: Play a chord 4 times on the 4 counts of metronome and take a break of 4 counts and play next chord of the progression.

Gradually increase the tempo from 80 to 120.

Level 2: Eliminate the break which we were taking to shift the chord and play each chord 4 times continuously without taking any breaks.

Gradually increase the tempo from 80 – 120.

Chapter 4B

Challenge yourself (Chords shifting test)

After practicing the progressions of chords you might have gained confidence in playing chords, right? So now, it is time to take a test of yourself.

Before testing yourself make sure to remember the chords as better as possible because this test will test your memory power as well as shifting of chords.

How to test yourself?

1. Make a list of all chords with their proper names.
2. Handover this list of chords to anyone.
3. Tell them to speak out chords from the list, each at 3 seconds gap.
4. As they speak the name of a chord you need to play that chord before they speak the next one. You will get the time of 3 seconds.
5. Play the chords with two hands.

You need to give test in 3 levels.

Levels of test:

Level 1: You need to give test of 6 random chords from the list at the speed of 3 seconds per chord.

Level 2: You need to give test of 12 random chords from the list at the speed of 2 seconds per chord.

Level 3: You need to give the test of 18 random chords from the list at the speed of 1 second per chord.

This test is the matter of honesty and discipline because only you will come to know whether the cord played is right or wrong so you need to be honest with yourself and clear all 3 levels of test and if you are not able to play then make sure to practice the previous lesson at a higher tempo.

Chapter 4C

More challenging (chords shifting test 2)

You can follow the same test given in the previous lesson at a higher speed and more number of chords.

Here is the one more test which you can do it yourself.

How to take test yourself?

1. Note down the names of all 24 chords (12 major + 12 minor)
2. Speak any 10 random chords and record your voice.
3. Make such 4-5 recordings each of 10 chords at a speed of 3 seconds per chord.
4. Wait for a day or two.
5. Once you forget the sequence of the chords you have recorded, play those recordings and play the chords with TWO HANDS.
6. You can make unlimited tests for yourself now. More you practice, better you get at shifting the chords.

These tests will help you never face problems in shifting chords if performed with honesty and discipline.

Chapter 4D

5 best exercises for shifting chords

Note:

1. LH – Left hand
2. RH – Right hand
3. LH notations denotes chords

Example:

LH:	C				C			
RH:	C	E	G	E	C	E	G	E

So, 'C' written in LH means C major chord. So, you need to play 'C major chord' with left hand and at the same time 'C' note with your right hand.

- Same applies for every exercise in this particular chapter.
- RED NOTES denote notes to be played in higher octave.

Exercise 1:

Beat	1	-	2	-	3	-	4	-
LH:	C				C			
RH:	C	E	G	E	C	E	G	E
LH:	G				G			
RH:	G	B	D	B	G	B	D	B
LH:	A#				A#			
RH:	A#	D	F	D	A#	D	F	D
LH:	B				B			
RH:	B	D#	F#	D#	B	D#	F#	D#
Metronome: 100 – 130 (Eight note format)								

Exercise 2:

Beat	1	-	2	-	3	-	4	-
LH:	C				C			
RH:	C	E	G	C	G	E	C	E
LH:	F#				F#			
RH:	F#	A#	C#	F#	C#	A#	F#	A#
LH:	D#				D#			
RH:	D#	G	A#	D#	A#	G	D#	G
LH:	Am				Am			
RH:	A	C	E	A	E	C	A	C
Metronome: 100 – 130 (Eight note format)								

Exercise 3:

Beat	1	-	2	-	3	-	4	-
LH:	C				C			
RH:	C	D	E	F	G	F	E	D
LH:	G				G			
RH:	G	A	B	C	D	C	B	A
LH:	D				D			
RH:	D	E	F#	G	A	G	F#	E
LH:	A				A			
RH:	A	B	C#	D	E	D	C#	B
Metronome: 100 – 130 (Eight note format)								

Exercise 4:

Beat	1	-	2	-	3	-	4	-
LH:	C		C		C		C	
RH:	C	D	E	F	G	A	B	C
LH:	G		G		G		G	
RH:	G	A	B	C	D	E	F#	G
LH:	D		D		D		D	
RH:	D	E	F#	G	A	B	C#	D
LH:	A		A		A		A	
RH:	A	B	C#	D	E	F#	G#	A
Metronome: 100 – 130 (Eight note format)								

Note: You need to continue the 3rd exercise with all major and minor scales.

Exercise 5:

Beat	1	-	2	-	3	-	4	-
LH:	C		C		C		C	
RH:	C	E	C	E	G	C	C	E
LH:	B		B		B		B	
RH:	B	D#	B	D#	F#	B	B	D#
LH:	E		E		E		E	
RH:	E	G#	E	G#	B	E	E	G#
LH:	G#		G#		G#		G#	
RH:	G#	C	G#	C	D#	G#	G#	C
Metronome: 100 – 130 (Eight note format)								

Chapter 4E

4 lessons to play chords on correct time

Note: In this chapter we need to play chords with both the hands.

Example:

LH:	C				C		C	
RH:	C				C		C	

Here, both C denotes chords. This means you need to play chords with both hands.

Lesson 1:

Beat	1	-	2	-	3	-	4	-
LH:	C				C		C	
RH:	C				C		C	
LH:	F#				F#		F#	
RH:	F#				F#		F#	
LH:	A				A		A	
RH:	A				A		A	
LH:	B				B		B	
RH:	B				B		B	
Metronome: 120 – 160								

Lesson 2:

Beat	1	-	2	-	3	-	4	-
LH:	C		C		C	C	C	C
RH:	C				C		C	
LH:	D#		D#		D#	D#	D#	D#
RH:	D#				D#		D#	
LH:	G		G		G	G	G	G
RH:	G				G		G	
LH:	E		E		E	E	E	E
RH:	E				E		E	
Metronome: 70 – 100								

Lesson 3:

Beat	1	-	2	-	3	-	4	-
LH:	C		C		C		C	
RH:	C		C					
LH:	Am		Am		Am		Am	
RH:	Am		Am					
LH:	F		F		F		F	
RH:	F		F					
LH:	G		G		G		G	
RH:	G		G					
Metronome: 120 – 160								

Lesson 4:

Beat	1	-	2	-	3	-	4	-
LH:	C	C	C	C	C	C	C	C
RH:	C		C		C		C	C
LH:	A	A	A	A	A	A	A	A
RH:	A		A		A		A	A
LH:	D#	D#	D#	D#	D#	D#	D#	D#
RH:	D#		D#		D#		D#	D#
LH:	G#	G#	G#	G#	G#	G#	G#	G#
RH:	G#		G#		G#		G#	G#
Metronome: 70 – 90								

In all the exercise of this chapter you need to play chords with both hands. All the letters written above denote chords.

Chapter 4F

Advanced exercises for chords coordination

Note:

1. LH – Left hand
2. RH – Right hand
3. LH notations denotes chords

Example:

LH:	C		C		G		G	
RH:	C	D	E	F	G	A	B	C

So, 'C & G' written in LH means C major chord & G major chord. So, you need to play 'C major chord' with left hand and at the same time 'C' note with your right hand.

- Same applies for every exercise in this particular chapter.
- Red note denotes notes to be played in higher octave.

Exercise 1:

Beat	1	-	2	-	3	-	4	-
LH:	C		C		G		G	
RH:	C	D	E	F	G	A	B	C
LH:	D		D		A		A	
RH:	D	E	F#	G	A	B	C#	D
LH:	E		E		B		B	
RH:	E	F#	G#	A	B	C#	D#	E
LH:	F		F		C		C	
RH:	F	G	A	A#	C	D	E	F
Metronome: 80 – 130 (Eight note format)								

Exercise 2:

Beat	1	-	2	-	3	-	4	-
LH:	C		G		C		G	
RH:	C	E	G	C	C	E	G	C
LH:	D		A		D		A	
RH:	D	F#	A	D	D	F#	A	D
LH:	E		B		E		B	
RH:	E	G#	B	E	E	G#	B	E
LH:	F		C		F		C	
RH:	F	A	C	F	F	A	C	F
Metronome: 80 – 90 (Eight note format)								

Exercise 3:

Beat	1	2	3	4	1	2	3	3
LH:	C	G	Am	F	Em	Dm	G	C
RH:	C	D	E	F	G	A	B	C
Metronome: 70 – 100 (Quarter note format)								

Chapter 4G

Step process to play songs with chords

To play chords with songs we need to follow 4 step framework called RCCR framework which will help us to play any song with chords.

R – Right hand mastery

Before applying chords to any song we need to make sure that the song is very well prepared with your right hand because that will allow our mind to be focused on left hand (Chords).

Here are the two steps to complete the first step of framework:

1. Master a song with right hand.
2. Play it on a rhythm/metronome.

After learning the song with right hand we need to play it in rhythm to get the idea of our next step which the placement of chord. Rhythm is very essential because playing a song in rhythm gives you a clear picture whether the song is very well prepared or not.

C – Chords placement

After master the song with right hand here is the next step which is the right placement of chord. Placement of chords means the exact time in a line of a song to play the chord.

Example: Gulabi aankhein... Jo teri dekhi

Now, placement of chords will help us identify where the chord is to be played in the line above.

To understand the right placement of chord we need to first identify the rhythm of the desired song. Once we get the counting of the song then we just need to identify which word of line falls on the first beat.

Example:

Beat: 1 2 3 4 1 2

Line: Gulabi aankhein... Jo teri dekhi

Now, here the words which falls on the 1st beat are ‘Ankhein’ & ‘Dekhi’.

So, the chords are to be played on these two words as it comes on the 1st beat.

Here are the 4 steps to complete the second step of the framework.

1. Listen carefully to the song.
2. Identify the words which falls on every 1st beat.
3. Play chords on the identified time without right hand. You can sing and play chords or play chords with the original track.
4. Play the chords with rhythm.

C – Coordination

After completing the 2nd step which is chord placement and after practicing just chords with original track now is the time to bring both the hands together.

Now, you might have practiced enough of chords and also the song that bringing it together would be a piece of cake.

Here are 2 steps to follow to complete the third step of framework.

1. Play it slow
2. Maintain sustain of the chords.
   Here is the trick which will help you a lot. We do not need to sustain the chord till the next chord is to be played. If we play the chord and lift our hands and move those to next chord before the next chord comes that would give us more time to shift and help us play the chords smoothly.

R – Rhythm

After learning and following the 3 steps of frame, last comes rhythm which will be a reality checker as it will help you understand whether the song is played correctly or not.

You can add any rhythm pattern here. Karaoke, Rhythm/Style track etc. Playing the songs on rhythm is essential.

Here are the notes of the song you need to practice.

Gulabi Aankhein – Notations

You need to play this song by using the 4 steps shown above.

Chapter 4H

Become master of playing songs with chords

After learning the RCCR framework, you need to learn as many songs as you can with chords as it would help you gain experience. In the initial songs you may end up spending a week on a single song but slowly as you attempt other songs the time to learn the songs will gradually decrease. For the next 4-5 songs you need to follow the same steps of RCCR framework but after that you will develop a sub-conscious habit of playing songs with chords.

From next page you will get the notations of 10 such songs with chords. Try playing all the songs from the list before moving to the next lesson. You are free to learn the songs out of this list. You can pick your favorite song and find notation of that on Google, YouTube, etc.

Chapter 4I

Learn advanced chords

What are advanced chords?

Advanced chords are nothing but an extended version of block chords/normal chords which we have learned and played so far.

How to play advanced chords?

I also call advanced chords as fat chords.

Here is the simple way to play it.

Block chord

Notation – C E G

Finger – 5 3 1

Fat chord

Notation – C G C

Finger – 5 2 1

Here we have just replaced the middle note of block chord with a root note of higher octave.

Remove the middle note of every chord and play the root note of that chord in next octave.

In fat chords, you do not need worry about whether the chord is major or minor. ‘C major’ and ‘C minor’ fat chord has same notes as middle note of the chord is eliminated which is deciding note between a major chord and a minor chord.

Piano Fat Chords

MODULE 5

Chapter 5A

5 Exercise to make left hand powerful

All the exercise in this video has to be practiced with left hand.

Exercise 1:

Beat	1	-	2	-	3	-	4	-
Notation	C	D	E	F	G	F	E	D
	D	E	F	G	A	G	F	E
	E	F	G	A	B	A	G	F
	F	G	A	B	C	B	A	G
	G	A	B	C	D	C	B	A
	A	B	C	D	E	D	C	B
	B	C	D	E	F	E	D	C
	C	D	E	F	G	F	E	D
Finger(LH)	5	4	3	2	1	2	3	4
Finger(RH)	1	2	3	4	5	4	3	2
Metronome: 60 – 140 (Eight note format)								

Exercise 2:

Beat	1	-	2	-	3	-	4	-
Notation	C	E	D	F	E	D	C	D
	D	F	E	G	F	E	D	E
	E	G	F	A	G	F	E	F
	F	A	G	B	A	G	F	G
	G	B	A	C	B	A	G	A
	A	C	B	D	C	B	A	B
	B	D	C	E	D	C	B	C
	C	E	D	F	E	D	C	D
Finger(LH)	5	3	4	2	3	4	5	4
Finger(RH)	1	3	2	4	3	2	1	2
Metronome: 60 – 140 (Eight note format)								

Exercise 3:

Beat	1	-	2	-	3	-	4	-
Notation	C	E	D	F	E	G	D	F
	D	F	E	G	F	A	E	G
	E	G	F	A	G	B	F	A
	F	A	G	B	A	C	G	B
	G	B	A	C	B	D	A	C
	A	C	B	D	C	E	B	D
	B	D	C	E	D	F	C	E
	C	E	D	F	E	G	D	F
Finger(LH)	5	3	4	2	3	1	4	2
Finger(RH)	1	3	2	4	3	5	2	4
Metronome: 60 – 140 (Eight note format)								

Exercise 4:

Beat	1	-	2	-	3	-	4	-
Notation	C	E	C	F	G	D	E	C
	D	F	D	G	A	E	F	D
	E	G	E	A	B	F	G	E
	F	A	F	B	C	G	A	F
	G	B	G	C	D	A	B	G
	A	C	A	D	E	B	C	A
	B	D	B	E	F	C	E	B
	C	E	C	F	G	D	D	C
Finger(LH)	5	3	5	2	1	4	3	5
Finger(RH)	1	3	1	4	5	2	3	1
Metronome: 60 – 140 (Eight note format)								

Exercise 5:

Beat	1	-	2	-	3	-
Notation	C	E	G	E	D	C
	D	F	A	F	E	D
	E	G	B	G	F	E
	F	A	C	A	G	F
	G	B	D	B	A	G
	A	C	E	C	B	A
	B	D	F	D	C	B
	C	E	G	E	D	C
Finger(LH)	5	3	1	3	4	5
Finger(RH)	1	3	5	3	2	1

Note: 5th exercise shall be played in ¾ time signature.

After playing it with left hand, we need to play this exercise with both hands. Finger position for both hands are given.

Chapter 5B

Advanced left hand exercises

There will be 3 exercise in this chapter which is challenging than the exercises of previous chapter.

Exercise 1:

Beat	1	-	2	-	3	-	4	-
Notation	C	E	G	C	G	E	C	E
	E	G	B	E	B	G	E	G
	G	B	D	G	D	B	G	B
	B	D	F	B	F	D	B	D
	C	E	G	C	G	E	C	E
Finger(LH)	5	3	2	1	2	3	5	3
Finger(RH)	1	2	3	5	3	2	1	2
Metronome: 100 – 150 (Eight note format)								

Exercise 2:

Beat	1	-	2	-	3	-	4	-
Notation	C	F	A	C	A	F	C	F
	E	A	C	E	C	A	E	A
	G	C	E	G	E	C	G	C
	B	E	G	B	G	E	B	E
	C	F	B	C	B	F	C	F
Finger(LH)	5	3	2	1	2	3	5	3
Finger(RH)	1	2	3	5	3	2	1	2
Metronome: 100 – 150 (Eight note format)								

Exercise 3:

Beat	1	-	2	-	3	-
Notation	C	G	C	G	E	C
	E	B	E	B	G	E
	G	D	G	D	B	G
	B	F	B	F	D	B
	C	G	C	G	E	C
Finger(LH)	5	2	1	2	3	5
Finger(RH)	1	3	5	3	2	1
Metronome: 100 – 150 (Eight note format)						

All the exercises should be practiced thoroughly on metronome at given BPM/Tempo.

After playing it with left hand, we need to play this exercise with both hands. Finger position for both hands are given.

Chapter 5C

Establishing two hands coordination

In this chapter we will learn 5 exercises to establish two hands coordination.

Exercise 1:

Play all scales with two hands.

This is a very simple looking exercise where you just need to play all major and minor scales (24 scales) with your both hands at the same time.

We have already learnt the scales and its notations with finger positions of both hands in Chapter 3A, 3B.

Metronome: 100 – 140 (Eight note format)

Exercise 2:

Beat	1	-	2	-	3	-	4	-
LH:	C	D	E	F	G	F	E	D
RH:	G	F	E	D	C	D	E	F
LH:	D	E	F	G	A	G	F	E
RH:	A	G	F	E	D	E	F	G
LH:	E	F	G	A	B	A	G	F
RH:	B	A	G	F	E	F	G	A
LH:	F	G	A	B	C	B	A	G
RH:	C	B	A	G	F	G	A	B
LH:	G	A	B	C	D	C	B	A
RH:	D	C	B	A	G	A	B	C
LH:	A	B	C	D	E	D	C	B
RH:	E	D	C	B	A	B	C	D
LH:	B	C	D	E	F	E	D	C
RH:	F	E	D	C	B	C	D	E
LH:	C	D	E	F	G	F	E	D
RH:	G	F	E	D	C	D	E	F
Metronome: 100 – 140 (Eight note format)								

Exercise 3:

Beat	1	-	2	-	3	-	4	-
LH:	C	G	F	E	D	C	D	E
RH:	C	D	E	F	G	F	E	D
LH:	D	A	G	F	E	D	E	F
RH:	D	E	F	G	A	G	F	E
LH:	E	B	A	G	F	E	F	G
RH:	E	F	G	A	B	A	G	F
LH:	F	C	B	A	G	F	G	A
RH:	F	G	A	B	C	B	A	G
LH:	G	D	C	B	A	G	A	B
RH:	G	A	B	C	D	C	B	A
LH:	A	E	D	C	B	A	B	C
RH:	A	B	C	D	E	D	C	B
LH:	B	F	E	D	C	B	C	D
RH:	B	C	D	E	F	E	D	C
LH:	C	G	F	E	D	C	D	E
RH:	C	D	E	F	G	F	E	D
Metronome: 100 – 140 (Eight note format)								

Exercise 4:

Beat	1	-	2	-	3	-	4	-
LH:	C	E	D	F	E	D	C	D
RH:	C	D	E	F	G	F	E	D
LH:	D	F	E	G	F	E	D	E
RH:	D	E	F	G	A	G	F	E

Metronome: 100 – 140 (Eight note format)								

Chapter 5D

What should be your daily practice routine?

In this chapter you will get 2 exercises which can be followed daily to nurture the concept of two hands coordination.

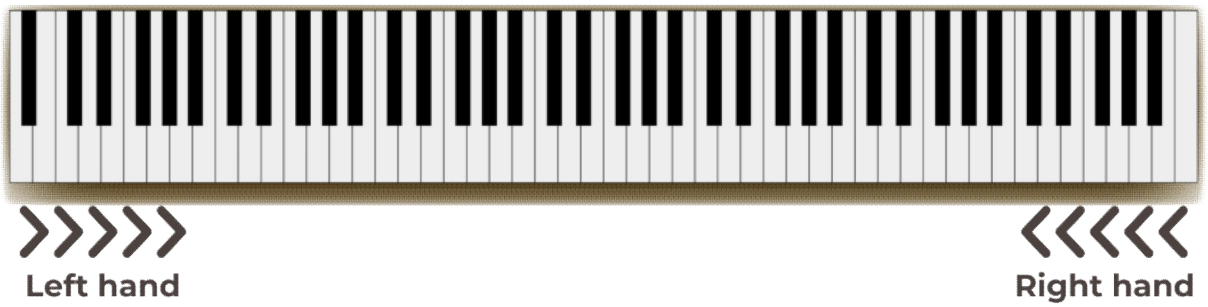

Exercise 1:

Note:

1. Left hand should start from the very first octave of keyboard.
2. Right hand should start from the very last octave of keyboard.
3. Both hands should be in the two extreme corners.
4. After completing the first line, LH will move in the right direction and RH will move in the left direction.
5. Notes are designed such that both hands will come closer as you progress.

Beat	1	-	2	-	3	-	4	-
LH:	G	F	E	D	C	D	E	F
RH:	C	D	E	F	G	F	E	D
LH:	A	G	F	E	D	E	F	G
RH:	B	C	D	E	F	E	D	C

This exercise should be continued till both of your hands meet.

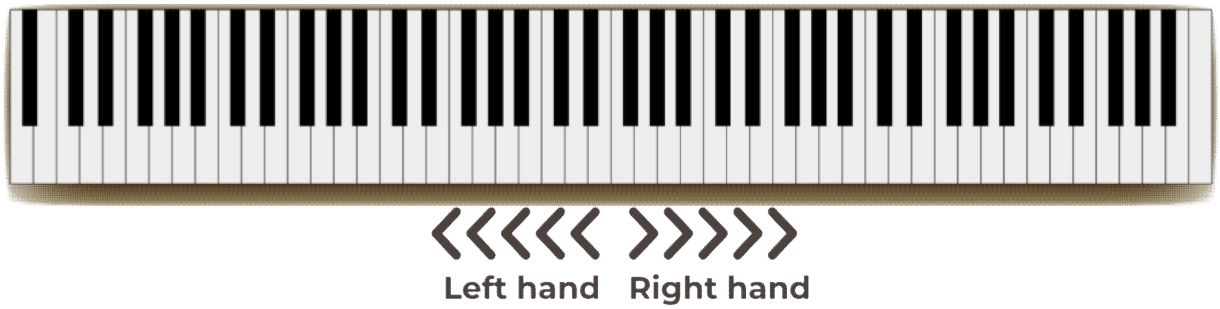

Exercise 2:

Note:

1. Both the hands will be in the middle octave and will start from the same note.
2. The hands will now move in opposite direction.

Beat	1	-	2	-	3	-	4	-
LH:	E	C	A	C	E	C	A	C
RH:	E	G	B	G	E	G	B	G
LH:	D	B	G	B	D	B	G	B
RH:	F	A	C	A	F	A	C	A

This exercise should be continued till both of your hands reach the extreme corners of keyboard.

You have to play these exercises on metronome. Tempo/BPM of these exercises depends on you. You need to test yourself and start with the tempo/BPM you are comfortable with and you need to go as high as you can in term of tempo for better results.

Chapter 5E

Master playing with both hands

This video consist of 4 exercises which will help you master the art of playing with both hands. Till now, we have practiced in such a way that both hands have equal number of notes. In this chapter, we will change the number of notes in both hands. The note count will be asymmetrical.

Exercise 1:

Beat	1	-	2	-	3	-	4	-	1	-	2	-	3	-	4	-
LH:	C		D		E		F		G		F		E		D	
RH:	G	F	E	D	C	D	E	F	G	F	E	D	C	D	E	F
LH:	D		E		F		G		A		G		F		E	
RH:	A	G	F	E	D	E	F	G	A	G	F	E	D	E	F	G
LH:	E		F		G		A		B		A		G		F	
RH:	B	A	G	F	E	F	G	A	B	A	G	F	E	F	G	A
LH:	F		G		A		B		C		B		A		G	
RH:	C	B	A	G	F	G	A	B	C	B	A	G	F	G	A	B
LH:	G		A		B		C		D		C		B		A	
RH:	D	C	B	A	G	A	B	C	D	C	B	A	G	A	B	C
LH:	A		B		C		D		E		D		C		B	
RH:	E	D	C	B	A	B	C	D	E	D	C	B	A	B	C	D
LH:	B		C		D		E		F		E		D		C	
RH:	F	E	D	C	B	C	D	E	F	E	D	C	B	C	D	E
LH:	C		D		E		F		G		F		E		D	
RH:	G	F	E	D	C	D	E	F	G	F	E	D	C	D	E	F
Metronome: 100 – 140 (Eight note format)																

Exercise 2:

Beat	1		-		2		-		3		-		4		-		1		-		2		-		3		-		4		-	
LH:	C				D				E				F				G				F				E				D

Chapter 5F

My favorite twister exercise

This video covers the last exercise for this module which will help you improve the finger movements in playing piano.

Note:

1. This exercise has to be played with both hands.
2. If a box include two notes, it means that both notes has to be played together.

Twister exercise

Beat:	1	2	3	4
Notations:	CE	DF	EG	DF
	DF	EG	FA	EG
	EG	FA	GB	FA
	FA	GB	AC	GB
	GB	AC	BD	AC
	AC	BD	CE	BD
	BD	CE	DF	CE
	CE	DF	EG	DF
Finger(LH)	53	42	31	42
Finger(RH)	13	24	35	24
Metronome: 120 – 180 (Quarter note format)				

Here, two notes displayed in a box need to be played together with a hand and same notes is to be with both hands.

MODULE 6

Chapter 6A

Introduction to arpeggios

What are arpeggios?

Arpeggio is nothing but a chord played in a broken format. In simple words, when the notes of the chords are played one by one in a particular pattern it is called arpeggios.

How to play arpeggios?

Before learning to play arpeggios we need to first learn about its coordination. If we directly play the arpeggio patterns with our song, we might mess up because our brain does not have enough coordination to play different patterns and melody line at same time. For that we need to first follow the exercise lessons to help boost our coordination.

There are different levels of arpeggios when it comes to playing patterns. We will play basic patterns when we are just starting out then I will teach you about the advanced patterns and many more things.

So with our next lesson, let us dive into learning arpeggios.

Chapter 6B

Arpeggio coordination exercise (4x4 Part-1)

In this video we will learn 4 exercises which will help you to establish the coordination of arpeggio.

Why it is important?

When we directly play arpeggios with songs we face struggle in playing correctly with both hands. We know the pattern and we know the melody of the song but still when it comes to playing with two hands we aren't able to play it. These problems are faced due to lack of arpeggio coordination between hands. So far we have already mastered playing different notes with two hands in previous module. So, these exercises will not take much time to practice but it will impact your playing style a lot.

Exercise 1:

Beat	1		-		2		-		3		-		4		-	
LH:	C		E		G		E		C		E		G		E	
RH:	C	D	E	F	G	F	E	D	C	D	E	F	G	F	E	D
LH:	G		B		D		B		G		B		D		B	
RH:	G	A	B	C	D	C	B	A	G	A	B	C	D	C	B	A
LH:	D		F#		A		F#		D		F#		A		F#	
RH:	D	E	F#	G	A	G	F#	E	D	E	F#	G	A	G	F#	E
LH:	A		C#		E		C#		A		C#		E		C#	
RH:	A	B	C#	D	E	D	C#	B	A	B	C#	D	E	D	C#	B
LH:	E		G#		B		G#		E		G#		B		G#	
RH:	E	F#	G#	A	B	A	G#	F#	E	F#	G#	A	B	A	G#	F#
LH:	B		D#		F#		D#		B		D#		F#		D#	
RH:	B	C#	D#	E	F#	E	D#	C#	B	C#	D#	E	F#	E	D#	C#
Metronome: 60 – 85																

Exercise 2:

Progression 1

Beat	1	-	2	-	3	-	4	-	1	-	2	-	3		-		4		-	
LH:	C		E		G		E		C		E		G				E			
RH:	C		D		E		F		G	F	E	D	C	D	E	F	G	F	E	D
LH:	G		B		D		B		G		B		D				B			
RH:	G		A		B		C		D	C	B	A	G	A	B	C	D	C	B	A
LH:	D		F#		A		F#		D		F#		A				F#			
RH:	D		E		F#		G		A	G	F#	E	D	E	F#	G	A	G	F#	E
LH:	A		C#		E		C#		A		C#		E				C#			
RH:	A		B		C#		D		E	D	C#	B	A	B	C#	D	E	D	C#	B
LH:	E		G#		B		G#		E		G#		B				G#			
RH:	E		F#		G#		A		B	A	G#	F#	E	F#	G#	A	B	A	G#	F#
LH:	B		D#		F#		D#		B		D#		F#				D#			
RH:	B		C#		D#		E		F#	E	D#	C#	B	C#	D#	E	F#	E	D#	C#
Metronome: 70 – 100																				

Progression 2:

Beat	1	-	2	-	3	-	4	-	1	-	2	-	3		-		4		-	
LH:	F#		A#		C#		A#		F#		A#		C#				A#			
RH:	F#		G#		A#		B		C#	B	A#	G#	F#	G#	A#	B	C#	B	A#	G#
LH:	F		A		C		A		F		A		C				A			
RH:	F		G		A		A#		C	A#	A	G	F	G	A	A#	C	A#	A	G
LH:	C#		F		G#		F		C#		F		G#				F			
RH:	C#		D#		F		F#		G#	F#	F	D#	C#	D#	F	F#	G#	F#	F	D#
LH:	G#		C		D#		C		G#		C		D#				C			
RH:	G#		A#		C		C#		D#	D#	C	A#	G#	A#	C	C#	D#	C#	C	A#
Metronome: 70 – 100																				

Note:

1. Read the beat counts twice to avoid any mistakes.
2. The first 1,2,3,4 is in eight note format and in last 1,2,3,4, the 3,4 is in sixteenth note format.

Exercise 3:

Beat	1	-	2	-	3	-	4	-	1	-	2	-	3	-	4	-
LH:	C		E		G		E		C		E		G		E	
RH:	C			D		E		F	G			F		E		D
LH:	G		B		D		B		G		B		D		B	
RH:	G			A		B		C	D			C		B		A
LH:	D		F#		A		F#		D		F#		A		F#	
RH:	D			E		F#		G	A			G		F#		E
LH:	A		C#		E		C#		A		C#		E		C#	
RH:	A			B		C#		D	E			D		C#		B
LH:	E		G#		B		G#		E		G#		B		G#	
RH:	E			F#		G#		A	B			A		G#		F#
LH:	B		D#		F#		D#		B		D#		F#		D#	
RH:	B			C#		D#		E	F#			E		D#		C#
Metronome: 120 – 170																

Exercise 4:

Beat	1	-	2	-	3		-		4		-	
LH:	C	E	G	E	C		E		G		E	
RH:	C		D		E	F	G	F		E		D
LH:	G	B	D	B	G		B		D		B	
RH:	G		A		B	C	D	C		B		A
LH:	D	F#	A	F#	D		F#		A		F#	
RH:	D		E		F#	G	A	G		F#		E
LH:	A	C#	E	C#	A		C#		E		C#	
RH:	A		B		C#	D	E	D		C#		B
LH:	E	G#	B	G#	E		G#		B		G#	
RH:	E		F#		G#	A	B	A		G#		F#
LH:	B	D#	F#	D#	B		D#		F#		D#	
RH:	B		C#		D#	E	F#	E		D#		C#
Metronome: 100 – 120												

Chapter 6C

Arpeggio coordination exercise (3x4 Part-2)

In this chapter we will learn 3 more exercises for arpeggio coordination which will be 3x4 time signature. This means you need to make sure that metronome that you see to complete the exercises of this chapter has 3 beats.

Note:

1. Two notes written together in a box means that notes has to be played together at same time.

Exercise 1:

Beat	1	-	2	-	3	-	1	-	2	-	3	-
LH:	C		EG		EG		C		EG		EG	
RH:	G		F	C	D	E	G		F	C	D	E
LH:	G		BD		BD		G		BD		BD	
RH:	D		C	G	A	B	D		C	G	A	B
LH:	D		F#A		F#A		D		F#A		F#A	
RH:	A		G	D	E	F#	A		G	D	E	F#
LH:	A		C#E		C#E		A		C#E		C#E	
RH:	E		D	A	B	C#	E		D	A	B	C#
LH:	E		G#B		G#B		E		G#B		G#B	
RH:	B		A	E	F#	G#	B		A	E	F#	G#
LH:	B		D#F#		D#F#		B		D#F#		D#F#	
RH:	F#		E	B	C#	D#	F#		E	B	C#	D#
Metronome: 120 – 160 (Eight note format)												

Exercise 2:

Beat	1	-	2	-	3	-	1	-	2	-	3	-
LH:	A		CE		CE		A		CE		CE	
RH:	A	C	B	D	C	B	A		B	C	D	
LH:	F		AC		AC		F		AC		AC	
RH:	F	A	G	B	A	G	F		G	A	B	
LH:	D		FA		FA		D		FA		FA	
RH:	D	F	E	G	F	E	D		E	F	G	
LH:	C		EG		EG		C		EG		EG	
RH:	C	E	D	F	E	D	C		D	E	F	
Metronome: 120 – 160 (Eight note format)												

Exercise 3:

Beat	1	-	2	-	3	-	1	-	2	-	3	-
LH:	F#		A#C#		A#C#		F#		A#C#		A#C#	
RH:		F#		G#		A#	B	C#	B	A#	G#	F#
LH:	D#		F#A#		F#A#		D#		F#A#		F#A#	
RH:		D#		F		F#	G#	A#	G#	F#	F	D#
LH:	B		D#F#		D#F#		B		D#F#		D#F#	
RH:		B		C#		D#	E	F#	E	D#	C#	B
LH:	C#		FG#		FG#		C#		FG#		FG#	
RH:		C#		D#		F	F#	G#	F#	F	D#	C#
Metronome: 120 – 160 (Eight note format)												

Chapter 6D

4 step process to play songs with arpeggios

Even after completing the exercises for arpeggios coordination, we need to follow certain steps which will help you boost up your practice. These will also help you to have smooth grip on arpeggios with songs with much efforts. Just how we followed the RCCR framework, in same way we need to follow these 4 steps.

1. **Learn song with chord**

   In this step, whichever song we want to play with arpeggios we need to first prepare that song perfectly with our right hand and chords.
   This song should be practiced such that it becomes so fluent and effortless that your brain has empty space to think about arpeggios. Also this song should be practiced with rhythm pattern as arpeggios and nothing but a rhythm pattern which is played by you.

2. **Learn left hand pattern and progression**

   After completing the first step, now is the time to practice the arpeggio pattern for that song. For now, the pattern should be fixed. If the song is in 4x4 time signature, you will play the pattern learnt in chapter 6B (the left hand part in the exercise is the pattern). If the song is in 3x4 time signature, you will play the pattern learnt in chapter 6C.

You need not to play song with this pattern. You only need to learn the pattern perfectly and learn this pattern from all the chords used in the song you just choose. Now, play the pattern from all the chords and just sing with it.

3. **Practice with both hands using base chord**

   After learning the pattern perfectly and playing it from all the chords, now you need to play it with both the hands but you only need to stick with the first chord of the song. Play the melody in the right hand. Play the pattern in the left hand. Do not change the chord in the left hand pattern as the song moves ahead. Play pattern from the first chord and continue it for the rest of the song.
   In this way you will develop the coordination of arpeggios with song.

4. **Change chords & start slow**

   After successfully playing song with arpeggios from one chord, now is the time to change the chords. If you honestly complete the 4 steps first then this step becomes an easy thing to do. Make sure to start very slowly for your brain to process the notations.

These 4 steps break down the process of playing arpeggios with song and after completing each step you will gradually lay the whole song fluently with arpeggios.

For now, use the 2 patterns which are described in chapter 6B & 6C for every song. Don't try to play any advanced patterns as this is a very initial stage of playing arpeggios with songs. Complete at least 10 songs with the basic arpeggio patterns before moving

to the next lesson. The first song will take a lot of time as this process is new for the brain but as you gradually play more songs you will develop confidence and the time to learn each song will decrease.

Practice 10 songs by following this steps and then you can move to the next chapter.

Chapter 6E

My 7 universal arpeggio patterns (4x4)

This chapter will give you 7 universal arpeggio patterns which can be used for almost every songs. If you master these 7 patterns then you can definitely play almost every song with arpeggios by selecting any one of them.

The below written patterns are from 'C major chord'. You need to learn it from every chord just by transferring the notes.

How can you transfer the notes?

You just need to identify the difference between two notes in terms of semitone. Then pick any note and add those semitones to it to form the pattern from that chord.

Another method is to see which notes are being used. Every pattern that you will see below only consist of notes of C Major Chord (C-E-G). You need to just transfer the pattern to different chord by replacing the notes of C major chord with different notes of chords.

Pattern 1:

Beat	1	-	2	-	3	-	4	-
Notations	C	G	C	G	E	G	C	G
Finger(LH):	5	2	1	2	1	2	1	2

Note: This notations are from C Major Chord. For other chords you need to above written steps.

Pattern 2:

Beat	1	-	2	-	3	-	4	-
Notations	C	G	C	E	G		((C))	
Finger(LH):	5	2	1	3	2		1	

Note: Note written in red color with two brackets represents the note to be played 2 octave higher from the root note 'C'. This is one octave high from the note 'C' (red color C).

Pattern 3:

Beat	1	-	2	-	3	-	4	-
Notations	C	G	C	E	G	E	C	E
Finger(LH):	5	2	1	3	2	3	5	3

Pattern 4:

Beat	1		-		2		-		3		-		4		-	
Notations	C			GC			GC					GC			GC	
Finger(LH):	5			21			21					21			21	

Pattern 5:

Beat	1		-		2		-		3		-		4		-	
Notations	C			GC			GC					((CEG))			GC	
Finger(LH):	5			21			21					531			21	

Note: The ((CEG)) written above represents C major chord to be played in two octaves higher from root note.

Pattern 6:

Beat	1		-		2		-		3		-		4		-	
Notations	C			GC	C		GC		C	GC		GC	C		GC	
Finger(LH):	5			21	5		21		5	21		21	5		21	

Pattern 7:

Beat	1	-	2	-	3	-	4	-
Notations	C	G	C	G	E	G	G	G
Finger(LH):	5	2	1	2	1	2	1	2

Lesson: Follow all arpeggio patterns with every chord and play it with scales first and then songs.

These patterns can be played with numerous songs and will suit with almost every 4x4 time signature song. There will be some exceptional 4x4 time signature songs where these patterns will not suit but don't worry, we also have a chapter ahead where we will be learning the patterns for those exceptional song types.

Chapter 6F

Some exceptional arpeggio pattern

This chapter will give you 3 exceptional pattern which are not as common as the 7 universal patterns. These patterns are suited for some songs for which you need to identify those type of songs.

Pattern 1:

This pattern is used for songs in 6x4 time signature.

Beat	1	2	3	4	5	6	1	2	3	4	5	6
Notations	C	G	C	E	G	((C))	G	E	C	G	C	G

This pattern need to be practiced first from every chords and then needed to follow by all 4 steps learnt in chapter 6D.

Songs on which this pattern will suit:

1. Kaise hua – Kabir Singh
2. Janam Janam – Diwale
3. Khamoshiyan – Khamoshiyan
4. Bol do na zara – Azhar

Pattern 2:

This pattern is used for songs in 4x4 time signature.

Beat	1	-	2	-	3	-	4	-
Notations	C	EG	G	EG	C	EG	G	EG

Note: Blue notes represents notes to be played in lower octave.

This pattern need to be practiced first from every chords and then needed to follow by all 4 steps learnt in chapter 6D.

Songs on which this pattern will suit:

1. Hai apna dil to awara
2. Tareef karon kya uski
3. Aaj kal tere mere pyaar ke charche
4. Zindagi ek safar hain suhana
5. Pyaar hua ekrar hua

This pattern is called Reggae Pattern.

Pattern 3:

This pattern is used for songs in 4x4 time signature.

Beat: 1 2 3 4

Notations: C EG EG G EG EG

This pattern might confuse you. So here, we providing you a link which you can paste on google to listen to the sample of this pattern.

Link:

https://bit.ly/boogie-woogie-pattern

This pattern need to be practiced first from every chords and then needed to follow by all 4 steps learnt in chapter 6D.

Songs on which this pattern will suit:

1. Inteha ho gayi
2. Kisi ki muskurahton pe ho nisar

This pattern is called boogie-woogie pattern.

Chapter 6G

My 4 universal arpeggio pattern (3x4)

This chapter has the pattern which can used for 3x4 time signature song. These are the patterns which will go on almost every song which has 3x4 time signature.

Pattern 1:

Beat	1	2	3
Notation	C	GC	GC
Finger(LH)	5	21	21

Pattern 2:

Beat	1	-	2	-	3	-
Notations	C	G	C		C	
Finger(LH)	5	2	1		1	

Pattern 3:

Beat	1	-	2	-	3	-
Notations	C	G	C	G	C	G
Finger(LH)	5	2	1	2	1	2

Pattern 4:

Beat	1	-	2	-	3	-	1	-	2	-	3	-
Notations	C		G	C	E	G	((C))		G		E	
Finger(LH)	5		2	1	3	2	1		2		3	

Lesson: Learn this pattern from every chord and play it with scales to practice it. You can also try songs (3x4 time signature) with these patterns.

Every pattern has a different mood. So, choose how you wanted your song to sound and then select the right pattern from this. You need play around the patterns and use trial and error method to get best out of this and make your song sound more professional and perfect.

Chapter 6H

How to identify patterns for your favorite songs?

This is a very subjective topic as every artist has a different taste when it comes to playing a song. Some might like the song more peaceful with less use of arpeggios and just simple breaking down of fat chords and some might like it in a more aggressive way.

For all there is a simple checklist which will help you identify the pattern for your songs.

1. **Rhythm/Beat of the song**
   This plays a very important role in identifying the patterns for your song. Every arpeggio you have learnt so far gives a different vibe/feel when you play it. If you play a song (4x4 time signature) with all 7 universal pattern, you will find that every pattern gives it a different vibe/feel. Some will make it acoustic song, some will make it a classical and some will keep it original.

   Now, The 7 universal patterns (4x4) + 3 exceptional pattern + 4 universal pattern (3x4) covers almost all the genres and all the types of songs.

2. **Feel of the song**
   It is up to an artist which feel he/she wants to create with his song. Some like it original and some of the wants it to be unique so they make it acoustic.

After understanding the original feel of the song, you need to decide which feel you want for your song.

3. **Time signature**
   We have already classified the patterns according to their time signature in the previous chapters. So now, we do not need to mix up the patterns. You cannot play a 4x4 song with a 3x4 pattern. If the time signature of the song is different than the pattern selected, your song will never sound good.
   So before selecting the pattern you also need to identify the time signature of the song.

If you keep these 3 points in mind then you can easily select an arpeggio pattern for your song. You just need to observe the beat of the song and time signature of the song and play around the patterns you have learnt. Once you have the basic understanding of the patterns to select then in the next chapter we will learn how to build your own arpeggio pattern.

Chapter 6I

Building your own arpeggio pattern

Once you start playing arpeggios with songs and once you gain confidence in playing the patterns you have learnt with songs, you develop a sense of pattern selection. The more songs you play with arpeggios, the more experience you will develop. This experience will help you building your own pattern.

If you are here on this chapter without learning arpeggios properly, you won't be able to make it by yourself because if you are not able to coordinate with arpeggios, you won't be able to think of new arpeggio pattern.

So, it is highly recommended that you learn arpeggios perfectly or complete the above lessons properly with honesty.

Now, I assume that you have gained enough experience in playing the patterns. If you observe the patterns of arpeggios in any time signature, you will notice that the notes used in any arpeggio pattern is of the respective chord that you are on. The pattern does not go out of the notes of chords. The octave in which the notes are played might change but the core notes does not change.

Example: Notations of 'C Major Chord': C-E-G.

Now, turn the page back and observe all the patterns that have been written so far.

You will observe that the notes used in pattern are C-E-G but the octave in which the notes are played is different but the notes does not change.

So, this is very clear that 1st step towards designing your own pattern is 'USE THE NOTES OF CHORD'. You can change and alter the octaves of those notes but the notes should remain same.

The other very important factor to design your own arpeggio pattern is time signature of the song. Time signature will give you an idea of the number of notes to be used for a pattern.

In the initial stage of building your own pattern you must use this rule of designing the pattern.

RULE: In a time signature, the number of counts determines how many notes to use. You can either use that exact number of notes or multiply the count by 2 and use that many notes.

Example:

In a time signature, if there are 4 counts then your arpeggio pattern should consist of 4 notes or 8 notes (multiply counts by 2).

In a time signature, if there are 3 counts then your arpeggio pattern should consist of 3 notes or 6 notes (multiply counts by 2).

This initial practice will give you clarity about the notes to use and number of notes to use.

Note: You can randomly play the notes of chords in 2 -3 octaves to design the arpeggio pattern. There is no rule to maintain any kind of sequence for the notations. You can play with notes and design the pattern which you feel sounds good. You can literally play any note in any octave from the notations of chord and it will

sound like a pattern but you need to make sure that the number of notes used in a pattern should be according to the rule.

Once you are comfortable with designing the patterns, you can then break the rule and play any number of notes in a pattern. Just make sure to maintain the rhythm and uniformity throughout the pattern.

You can take inspiration from the original song or any cover of that song from social media handles. The more you will try to build, the more better you get at it.

Chapter 6J

How to improvise with arpeggios?

Now that you have learnt the coordination of arpeggios and are able to play arpeggios with your favorite songs, you now need to structure the way you use those patterns. This is what improvisation means.

How do you structure it?

Every song you play has an original version of it for you to listen. If you listen to the song you will find out that there are stems of that music.

The song does not start directly with all layers of music (Background score, beat, vocals etc). The song starts by sing any one of them and then gradually the more layers are added. In the same way when we play any song, we do not need to start directly with pattern we have leant for the song. You need to breakdown the structure.

Here are the steps you can use on any song to make it a beautiful cover.

1. **Chords**
   You can start with basic block chords or 2 note chords (just eliminate the middle note from block chord to make it a 2 note chord). Once you start with simple and gentle chords, it gives a beautiful start to the song.

2. **Simple pattern**
   As you move ahead, find a right time to add a simple pattern to song. Simple pattern is nothing but a easy version of the pattern you have prepared for that song. You can just eliminate some notes from the main core pattern to make it a simple pattern.

3. **Creating a punch**
   Once the song reach the main line for which the song is known, you need to create a punch before that line. You can create punch by repeatedly playing a chord or by stopping the pattern before that line etc. This punch depends on the type of song and that is why listening the song before playing is important.

4. **Main advanced pattern**
   After punch, you can play the main advanced pattern which you have prepared for that song. You can continue it for the rest of song or according to the song you can repeat the above steps that is creating a punch or adding block chords. This again depends on the original composition of the song and how you want it to sound.

5. **Simple pattern/chords**
   When you reach the ending of the song, change the advanced pattern again in the simple pattern or block chords because it gives a song a smooth ending.

This 5 step improvisation technique will help you design or structure any song on piano. You can change the sequence of the technique according to the song you play. As every song is a

unique composition, you cannot rely on any one step-process or technique but the fundamental rules remain the same. You can again take inspiration from the original song. You need to observe the rhythm track. The way it changes with the changes are the indicators for you to change the patterns accordingly. Arpeggio is a rhythm track for your melody line. So, observe the rhythm tack and use these 5 steps to make song even more beautiful and professional.

MODULE 7

Chapter 7A

Ear training: Play any song by ear

This is a dream topic of every pianist. From the day we start learning piano our only goal is to our favorite songs on piano fluently and enjoy the music. Till now, whatever we have learned is taught by this book. Now comes the time to become independent. After this module you will be able to play whatever song you like without help of any book or any teacher. This concept is called ear training where you train your ears so much that you can play what you hear. It can be a song or a music piece.

This concept requires honesty and discipline as this is just a book. There is no one above you to monitor or control you other than you yourself. This module will give you the way to train your ears and practice it just by yourself.

As this is a book we cannot perform any ear training test as it deals with AUDIOS. So, here I will give you a step process in which you need to train your ears.

1. **Identify notes on piano (Strings sound)**

   You can perform this by yourself or you can take help of anyone. Here is what you need to do.
   Change your keyboard settings from piano to strings sound. If you do not have strings then you can keep the piano sound.

   Take your phone and open the recorder app. Play any note on strings or piano and record it. It should just one note.

Now, in the same way record all 12 notes. So you have now 12 audio files of single note sound. (name that file should be the note name)
If you are doing this just by yourself then you need to wait for a day or 2 before you follow the next step. If you are taking help of anyone, you can directly start practicing.

If you are taking help of anyone ask them to play any random audio file from the 12 files that you have given them. As the audio is being played, you need to identify which is the note that is played in the audio file. Practice that till you identify the right note every single time.

If you are not taking help of anyone then you need to download a audio player, Make a playlist of those 12 files and then shuffle it so that it plays a random file. Practice that till you get right note every time.

When you are confident that you are finding the correct note every time, you need to increase the number of notes. Increase the number of notes from 1 to 2. Now record such 10-15 files of two notes played one after another and name them from the notes you played. Then again follow the same process where the random files are played and you identify the notes.

After gaining confidence in this, increase the note count to 4 and record at least 5 files and practice with the same process.

After doing this numerous time, you will develop the ears where you are able to identify the sound of strings on piano.

2. **Identify notes on piano (Piano sound)**

   Follow the same process you followed with the strings sound. The only thing that has changed is strings sound. Now, you need to practice with the piano sound. Record single note then two notes then 4 notes.

   This will develop your ears even more because there is difference between strings sound and piano sound. Piano sound is difficult to identify in comparison to the strings sound.

After training your ears enough now we need to understand how scales will help you identify the notes of your songs, the chords of your songs, and the scale of your songs. Every song which is ever created is composed using a scale. Scale is a set of seven unique notes which are the building block of any song. The songs is made using these 7 seven notes. It is also not necessary that only 7 seven notes are used a song. There are certain lines in songs which has notes out of that scale but that is beauty of composer as he/she select such notes which sounds beautiful even out of the scale.

Understanding and recalling scales will help you a lot in boosting your training speed.

Now, the next steps towards finding notes of the song are very simple. It is quite similar to finding strings sound on piano.

Every song consists of words which are sung in a ‘SUR’ and that makes it a song. So we just need to convert these words into humming (Humming means speaking or singing with lips closed). When you hum the songs, you are generating a string

type voice from your mouth. We have already practiced finding the strings sound on piano.

We need to change the keyboard setting to strings as it resonates more with the humming.

Here, we need to break down the process.

1. **Practice single words.**
   Every line consist of few words but we only need to find one word at a time.

2. **Practice two words**
   After finding one word you should start practicing two words at a time. Hum the two words and identify them on piano.

3. **Practice the lines**
   Every song consists of many lines but we will only focus on one line at a time.

4. **Completing the whole song**
   Reaching here, you would have practiced enough that now you are able to find the notes of your song just by listening to it.

This is long learning process. So, you need to be patient with the actions. There will be time where you will not be able to identify even single word or note on piano but trust the process and trust your ears. The first song might take 10 days to find notes of it but as you keep finding more and more songs the time to find each song will gradually decrease and then a time will come where you will just listen to the song and keep your hands on piano and

the song will flow.
Reaching this stage is not a miracle. It is just practice practice practice.

Just follow each and every lesson with honesty and discipline and you will definitely achieve the results.

Here are the 10 songs you need to find to practice ear training.

1. Tujhme rab dikhta hain
2. Tere jaisa yaar kahan
3. Tujhe kitna chahne lage hum
4. Kesariya
5. Tujhse naraz nahi zindagi
6. Likhe jo khat tujhe
7. Hai apna ddil to awara
8. Ek ajnaabe haseena sse
9. Pal pal dil ke paas
10. Dilbar mere kab tak mujhe

MODULE 8

Chapter 8A

How to find scales of songs?

Scale finding is connected to notes finding, If you are able to find notes of the song then you are easily able to find scale of the song.

Finding scale of the song has basically 3 steps:

1. **Find out notes of the song**
   When you want to find the scale of the song, first you need to find the notes of that song by following the steps learned in previous module.

2. **Note down the unique notes used in that song**
   After finding the whole song on piano by yourself, observe the unique notes used in that song. There will be 8-9 unique notes used in the song.

3. **Find out scale**
   Once you get the unique notes, check which scale has such notes. Generally the first line of the song will give you an idea about the notes used. Also check the notes where the song is revolving more. If there is a note used in the song only on certain lines or only used once or twice that means that note is not of the scale. The notes which are used often holds more weight.

This concept is again a long learning concept, the more songs you will find, the more better you get at it.

The first couple of songs will take a lot of time as you will get confuse which is the actual scale of the song but as you move ahead and find more songs you will get better at it.

This all will make sense to you only if you have followed the previous module with honesty and are able to find notes of the songs easily.

Chapter 8B

Major scale or minor scale (How to decide?)

This question should not arise if you have completed the previous chapter and started finding the scales of the songs.

Still this is a major question in everyone's mind when it comes to finding the scale of the song.

So here is the answer:

When you find the unique notes of the song you will observe that you will get notes which are similar in two scales because of the relative major and minor. So, how do you decide which is the scale?

You need to observe every first lines of the songs and every last lines of the songs. Majority of the times these notes will revolve around the first 2-3 notes of the scale. You need to then use trial and error method for the first couple of songs to develop that experience. Once you develop experience you will easily able to identify whether the song is in major scale or minor scale.

These two modules (7th & 8th) requires only practice and experience. As this is long process you need to keep walking on this path and you will reach the destination after a couple of weeks. If you continue to find notes of the songs and try finding scale of them as well, you will see drastic difference in what you were befor and what you are after.

Chapter 8C

Learning chord families

From this chapter we will start focusing on how to find chords of the songs by yourself. This chapter will help you clear the basics of chord families and why it is important to learn?

What is chord family?

Chord family is a set of chords used for a particular scale.

Example: If the song is in C major scale, chords of C major chord family are used for that song.

Every chord family has 7 unique chords which are used to when the song is in that scale.

Why it is important?

Chord family gives you a set of chords to be used for songs. Finding chord family eliminates 60% of the major chords and minor chords. This gives us an edge to find chords for our song.

It gives us selected chords which are easy for trial and error method to find chords of the songs.

When we want to find chords for a music piece, it is easy to decide from 7 chords rather than 24 chords.

How to find chord family chords?

It is very simple we just need to know scales and basics of chords to find a chord family.

Here are the steps to find a chord family.

1. **Write down the scale.**
   C Major Scale – C D E F G A B C

2. **Form triads**
   After writing the scale with 7 unique notes, start from the first note. Write down the first note, then skip one note and write down the third note. Skip one note again and write down the fifth note. Repeat this pattern starting from the second note of the scale. Write down the second note, skip one note, and write down the fourth note. Skip one note and write down the sixth note. Keep going with this pattern till you find the 7 unique chords!

   Example: Chords of C major chord family:
   1. C-E-G (C major chord)
   2. D-F-G (D minor chord)
   3. E-G-B (E minor chord)
   4. F-A-C (F major chord)
   5. G-B-D (G major chord)
   6. A-C-E (A minor chord)
   7. B-D-F (B diminished chord)

   Observe the notes of the chord, they are selected based upon the notation of the C major scale.

Now, you need to find all the chord families. Once you find 24 chord families, you are ready to find chords of the songs.

Chords family cheatsheet

Note:

1. Letters written under 1, 2, 3, 4, 5, 6, and 7 refers to the chords.
2. Only letter means major chord. Example – C (C major chord)
3. Letter with small ‘m’ means minor chord – Dm (D minor chord)
4. Letter with ‘dim’ means diminished chord – Bdim (B diminished chord)

MAJOR CHORD FAMILY							
Scale	1	2	3	4	5	6	7
C major	C	Dm	Em	F	G	Am	Bdim
C# major	C#	D#m	Fm	F#	G#	A#m	Cdim
D major	D	Em	F#m	G	A	Bm	C#dim
D# major	D#	Fm	Gm	G#	A#	Cm	Ddim
E major	E	F#m	G#m	A	B	C#m	D#dim
F major	F	Gm	Am	A#	C	Dm	Edim
F# major	F#	G#m	A#m	B	C#	D#m	Fdim
G major	G	Am	Bm	C	D	Em	F#dim
G# major	G#	A#m	Cm	C#	D#	Fm	Gdim
A major	A	Bm	C#m	D	E	F#m	G#dim
A# major	A#	Cm	Dm	D#	F	Gm	Adim
B major	B	C#m	D#m	E	F#	G#m	A#dim

MINOR CHORD FAMILY							
Scale	1	2	3	4	5	6	7
C minor	Cm	Ddim	D#	Fm	Gm	G#	A#
C# minor	C#m	D#dim	E	F#m	G#m	A	B
D minor	Dm	Edim	F	Gm	Am	A#	C
D# minor	D#m	Fdim	F#	G#m	A#m	B	C#
E minor	Em	F#dim	G	Am	Bm	C	D
F minor	Fm	Gdim	G#	A#m	Cm	C#	D#
F# minor	F#m	G#dim	A	Bm	C#m	D	E
G minor	Gm	Adim	A#	Cm	Dm	D#	F
G# minor	G#m	A#dim	B	C#m	D#m	E	F#
A minor	Am	Bdim	C	Dm	Em	F	G
A# minor	A#m	Cdim	C#	D#m	Fm	F#	G#
B minor	Bm	C#dim	D	Em	F#m	G	A

Chapter 8D

How to find chords of songs by ear?

In order to find chords of the song, you need to follow the 3 steps and you will chords easily.

1. **Identify the time to play chord**
   In a song, you need to identify where the chords are to be played. This should be precise. The exact word and the exact note on which the chord is to be played should be known.

2. **Notes played at time in RH**
   When you identify the exact time in the song to play the chord, identify which notes are being played at that time in right hand because that will give you an idea of the chord to select.

3. **Selection of chord**
   When you know which note is being played in the right hand at that time, you need to check which chord has that note from the chord family of that scale.
   Suppose the song has C major scale, and a chord is to be played on D note then you can pick the chords from C major chord family that has D note in it.
   Answer – D minor, G major, B diminished.

   You can now play any chord from the 3 chords on that part. You need to check which chord suits more.

Also when selecting the chord you need to look at the notes used just after and before the time of chord. It will also give you the basic idea of selection of chords. That exact note at the time of the chord is not the only decider of the chord to be played. You need to consider the notes played just before and after that exact note.

For the initial songs you need to follow these 3 steps but as you find more, you will know which chord will suit. You will not use trial and error method then.

Selection of chord is very important as there is no right chord and wrong chord in music. If what you play is soothing to ears then that becomes a right thing.

Chapter 8E

Learning priority chords (Major & Minor progressions)

What are priority chord?

Priority chords are set of chords which are of chord family but are often used in a song. A chord family has 7 chords but among them there are 4 chords which are widely used in Bollywood music. These 4 chords makes the selection even more easy as you now only need to decide from 4 chords rather than from 7 chords.

Before learning priority chords, we need to learn what are chord progression?

Chord progression is a set or sequence of chords used in a particular song. It means that if a song has 3 chords used in it then chord progression of that song will be those 3 chords. Chord progression is basically chords which form a group and are played in sequence.

When we talk about the priority chords, there are two progressions which we need to learn to form a priority chord progression. There are 4 priority chords in a chord family and these 4 chords will form a progression.
There will be two progressions.

1. Major priority chord progression
2. Minor priority chord progression

How to find the MAJOR PRIORITY CHORD PROGRESSION?

This is very simple, you just need to pick 1st, 6th, 4th, 5th chord from a major chord family. These 4 chords are the priority chords for a song in major scale.

Example: Priority chords for a song in C major scale

1st chord of C major family – C major chord

6th chord of C major family – A minor chord

4th chord of C major family – F major chord

5th chord of C major family – G major chord.

These four chords will be the most commonly used chords in a major scale. This is just one major chord priority chord progression. There are 12 such progressions of priority chords but you only need to remember progression of the scale in which the song is.

If the song is in G major scale then you can on the spot find the priority chords of G major scale by using the 1st, 6th, 4th, 5th chord of that G major family.

How to find MINOR PRIORITY CHORD PROGRESSION?

For this the simple rule is 1st, 7th, 6th, 5th chord of minor family gives you a minor priority chord progression.

Example: Priority chords of a song in A minor scale

1st chord of A minor family – A minor chord

7th chord of A minor family – G major chord

6th chord of A minor family – F major chord

5th chord of A minor family – E minor chord

These four chords will be the most commonly used chords in a minor scale song. Again this is just one progression there 12 such but you need to remember the progression of the scale you are playing in.

Why these are priority chords?

These are priority chords just because these chords covers all the notes of a scale. And these chords when even randomly played after each other sounds beautiful. If you want to find chord for your song and if you use these priority chords by keeping in mind the 3 steps learnt in previous chapter you will achieve your goal.

Most artist when playing songs on public demand use these progressions as it is easy to remember and never fails.

So, use these priority chords in your song and no one tell the difference between your version of the song and the original version of the song.

Even most of the Bollywood songs has these priority chords used in their songs.

This again gets better with more and more experience. The more songs you play and the more chords you find the better and quick you get at the selection.

The 7th and 8th module is all about the practice and experience. I have repeated this many times in these modules because this is the reality. There is no magical formula which you can apply on

songs and you will be able to find the notes, chords and scale of the song within minutes. Every artist has practiced this for months and year and that is the sole reason why they are so quick with the songs finding. There is no secret spell for this concept.

The more you practice, the better you get at it.

MODULE 9

Chapter 9A

How to use touch sensitive function?

Certain keyboards have a function called touch sensitive keys which is used by almost all artists who are playing it professionally because it gives the music a human touch.

What are touch sensitive keys?

Touch sensitive keys means the ability of keys to manage volume of note depending upon the pressure on it.

In simple words, when you press the key with a high pressure, the sound will be more. When you press the key of a piano/keyboard with a very less pressure, the sound will be less.

This function creates a dynamic range in your song. If all the notes are played at same volume it would be sound a little mechanic. So in order to make your song more humanly, touch sensitive keys are used.

Pressing with a low pressure on certain notes of the song and pressing it with a high pressure on certain notes of the song makes it an emotional song because the volume and intensity of the song changes.

How to practice that?

It is very simple, you just need to play scales but now using touch sensitive function. You need to start the scale with less pressure means less sound and as you reach towards the end of the scale,

you need to increase the volume by pressing with a high pressure.

You can also try this with exercises you have learnt in the chapters so far.

You can observe the covers of different artists. You need to observe how they are creating emotion using this function and then try to apply the same.
You just need to practice it for couple of songs and then this habit will a subconscious habit.

Chapter 9B

How to use fillers in songs?

What are fillers?

Fillers are the extra notes which are played in between the two lines to make it sound more beautiful and to fill the gap between two lines.

How to design the fillers?

Fillers are made of the notes of a scale. The scale of the song is the deciding factor of the scale of the filler.

If the song is in G major scale, the fillers should be made only by using the notes of G major scale.

Notes of the fillers can be randomly selected from the notes of the scale. You can use your creativity to design the fillers. Just how we designed our own arpeggio patterns, we need to design the fillers.

For beginners in using fillers, you should only use it if there is gap of at least 2 beats between two lines.

In these 2 beats you can add some extra 3-5 notes of the respective scale to make it sound good.

What is the frequency of using fillers?

In a song there should be less fillers and should be played only around the main hook lines to highlight the creative part. If you overuse it, the fillers will not be appreciated. It should be only played between some of the lines from whole song. It should not be played after every line. We need to maintain the scarcity of the

fillers in order to surprise the audience and to add emotion to your song.

Generally fillers start from high octaves and comes to note from where the next line is going to start. There are also some fillers which goes from lower octaves to higher octave in order to shift the octave of the song.

This is again a subjective topic. Every artist makes the different fillers. You are free to design the fillers in your own creative way.

You should decide the notes of the fillers and you should the time to play filler.

Chapter 9C

How to use harmonies in songs?

Harmonies means two ‘surs’ played or sung at a time. You might have noticed artists who play piano play two notes together in a melody of the song. These are called harmonies.

How to use it?

When you are on any note of the melody line and if you want to play two notes at a time then you can add a note lower to the main note. The second should maintain the flow of the song and should sound melodious.

In order to make it sound melodious, you need to check the main note of the melody line and then see if you can add a note which forms a chord.

Example: If the song is in A minor scale and the main note of the melody line is ‘C’ with which you want to add another note then you can add the note ‘A’ because ‘A’ comes before ‘C’ and also ‘A’ and ‘C’ are the notes of ‘A minor chord’. Similarly if you are on ‘B’ note then you can add ‘G’ note or ‘E’ note because these notes come before ‘B’ and ‘G-B’ fare two notes of G major chord and ‘E-B’ are the notes of ‘E minor chord’.

The extra note added should always be below the main note. If the main note is below the melody note then the extra note added holds more power.

Always remember to add an extra note lower than the main note.

Always remember that the note added should be the notes of any chord from chord family. If you play ‘A-D’ together it will not

sound as good as ‘B-D’ because ‘B-D’ are the notes of G major and B diminished chord.

Use your own brain and creativity to design the harmonies for songs. If the notes sounds melodious then it is green flag but it does not go with the flow of the song, you need to either change the notes or change the time to play harmony.

Chapter 9D

Understanding the functions: Layering, Splitting, and Rhythm tracks

These are functions which are built-in functions of keyboard. If you keyboard does not have these functions then you skip this chapter.

Layering: Layering is built-in function of a keyboard two different sounds of an instruments are layered to make a unique sound. At a time we can only play a single instrument but this function enables us to play two instruments at a same time.

To layer sounds, there is simple rule of sustained and percussive sound.

Sustained sound – It is a continuous sound and prolonged sound, like a steady note.

Example: Strings, Flute, Violin, Cello, Saxophone, harmonium, etc.

Percussive sound – It refers to sharp, striking sound, like the beat of drum or something that is not continuous.

Example: Piano, Guitar, Santoor, Sitar etc.

When you layer a combination of sustained and percussive sound it will become a unique and beautiful sound. You can use this type of layers in your sound to make the song sound unique.

Splitting – Splitting is also a built-in function of a keyboard where you are allowed to keep a different sound in some octaves and a different sound in rest of the octaves.

This allows us to play melody and chords in a different sound at a same time.

This function also follows the same rule of sustained and percussive sound.

Either there should be percussive chords and sustained melody or sustained chords and percussive melody.

This also adds a spice to your songs.

Rhythm tracks – Instead of playing a song with just normal melody and chords, you can also add rhythm tracks to make it sound like an original instrumental version of the song.

There are certain built-in rhythm/styles in keyboard which can be used according to the song. You need to check the in-built rhythm and look for the right rhythm for your song. The kind of beat original song has, you need to search for the similar bear in your keyboard. This is a long and boring thing as you need to check all the beats. Once you explore the beat of keyboard then you will easily able to find the right one for your next songs.

There are many karaoke tracks available of the songs too on YouTube for you to play instruments on it. People use it to sing along with the track but we will use it to play keyboard with it.

You can either use built-in rhythms or karaoke tracks to play your songs with rhythm and make it sound like original version.

Chapter 9E

How to use sustain pedal?

Sustain pedal is an accessory of a keyboard which is connected with the keyboard to make your sound sustain even more. It is a pedal just like car accelerator. You need to press it if you want to make your sound sustain. Sustain makes the sound more dramatic and emotional. A touch sensitive key with sustain pedal makes a song humanly.

How to use sustain pedal?

Sustain pedal cannot be released or pressed any time otherwise it will create a very bad sound or the listeners as they want a consistency in a music in terms of sustain.

You need to make sure that when you are playing any song with chords or arpeggios, you need to release the sustain pedal (lifting your leg from it) just right before you play the next chord/arpeggio. That will make a room for the next chord to flow in. If you continuously keep pressing the sustain pedal the sound of previous chord/arpeggio will continue and that sound will disturb the next chord/arpeggio.

There is a very small fraction of seconds for lifting the pedal and pressing it again. You need to find that gap. The gap is between the last note of line & chord/arpeggio and beginning of next line & chord/arpeggio.

Once you start practicing the pedal, initially you need to play everything at slow speed, there you need to practice finding that gap for lifting the pedal and pressing it again. Once you master that gap that will become a effortless habit for you.

MODULE 10

Chapter 10A

What to play on piano with singer?

This is a very common question which is asked by artists when it comes to performing live with a singer.

If you have to play alone then there is no issue as you just need to play what you have prepared. When it comes to performing with a singer, you cannot play what you just play alone. When a singer comes into picture, you need to coordinate with him/her.

Here is what you need to play when a singer is singing:

1. **Chords**
   This is very easy way to handle a singer by just playing chords of the song and not playing melody line because that is something for which the singer is there. So, we just need to play chords with both our hands in two octaves. These chords can be layered or you use the split sound function. You can change the sound from piano to any other instrument according to the demand of the song.

2. **Arpeggio pattern**
   You can also just play arpeggio pattern with left hand and respective chords in right hand to make it richer in sound. You can again use the layering/splitting function in your keyboard but you need to make sure that arpeggio should be played only with a percussive sound. For chords you can choose a different sound. You can also use a combination of two steps where on some parts you play chords with both hands and on some part you play arpeggio and chords.

3. **Fillers & harmonies**
   As we have already learnt how to use fillers and how to use harmonies, you need to now add these techniques to your arpeggios and chords. You can add sweet little fillers between two lines to add spice to your music. You can play a melody line but not in whole song. You can play a half line to add harmonies and fillers.

When you use these 3 things at a time, you will create a very beautiful background score for your singer. You need to be creative in choosing the right time for arpeggios and chords. You need to creative in designing fillers and right time for harmonies.

This is again a subjective topic where different artists choose different patterns and timing for chords/fillers/harmonies. The more you practice the better you design your background score.

Chapter 10B

How to make your own intro & outro music?

To make your own intro and outro music, you need to understand the 3 pillars of any music piece.

1. Chord progression
2. Time signature
3. Scale

Let us understand each of the pillar in detail.

1. **Chord progression**
   When designing any intro or outro music or any music between two paragraphs of a songs, the chord progression of that song plays a very important role because that will give an idea of notes to be used in a music.
   Observing the chord pattern used in a song is very important. If there is no chord pattern then you just need to remember the chords used more often in song.

2. **Time Signature**
   Time signature is the pillar which will keep you in rhythm. A song played offbeat is just a noise. If you are not able to play any song in a proper rhythm, you will not be able to design the intro/outro music. Observing the time signature of that song is very important.

3. **Scale**

   Scale is the final stage of designing any music. You need to remain in the scale in order to make your music. If the song is in G major scale then your music should only consist notes of G major scale. This is very similar as designing fillers for songs. The only difference is the length of designing. You need to play around the notes of its respective scale to make a good music. Also you need to follow the same progression used in respective song.

   You need to follow simple step to make music:

   Firstly, check the progression and repeat the same for 1-2 times. Now, when you need to play notes of music in your right hand, you need to design the notes in such a way that you hit next chord in progression at the same time you hit any note of that chord in your right hand.

   Example: Am G

   Music Line 1

   A E D C D

   This is a very basic example where I have designed a small line with two chords and when I change chord I play any note of that chord. When I played 'Am' chord, I played 'A' note. When I shifted it to 'G' chord, I played 'D' note which is note of 'G' major chord (G-B-D).

   So, this is how you need to create our music where notes can be random but when shifting chords it is better to hit the note of that chord.

   Note:

   1. You need to use the notes of that respective scale only. Notes outside of the scale should be avoided to make it easy to select the notes.

2. Maintain the rhythm of the song and use less notes when you are just starting out. Clutter is worse than playing less notes.

If you keep these things in mind while designing anything on piano (Fillers, intro/outro music, song composing) you will definitely create a good piece of music.

Do not expect to create a masterpiece from the day 1.

Do not expect to create the music live on the spot. Take your time before playing that song to have good and confident music.

You will develop experience as you keep creating music.

Remember, you don’t need to create an epic music which nobody can play. You should focus on creating music which is loved by audience. It is not necessary that the more notes you play the better it sounds. Simplicity is always appreciated.

Chapter 10C

How to transpose the scale & learn facial expressions

What is scale transposing?

Scale transposing is a built-in function of keyboard. It is ability to get similar sound of a note from a different key.

In simple words, what if I say you can get sound of ‘A’ note by pressing ‘C’ note. This is called scale transposing.

What is the use case of it?

Assume you have prepared an song from ‘G’ major scale. The singer has prepared the same song from ‘C’ major scale according to his/her vocal range. Now, there is a difference in what you have prepared what is going to be sung. You cannot play from ‘G’ major scale if the singer is singing from ‘C’ major scale because if you do it, it will not sound melodious. It will be called ‘Besura gaana’. In such cases, if you can transfer the notes of ‘A’ major scale that is if you can transfer the exact sound of ‘A’ major scale to the keys of ‘G’ major scale, both of you can now perform together with a melodious sound.

How to do it?

To make it easy, answer this two question:

1. What key you will be playing?
2. What sound do you want there?

Now, follow the simple procedure.

If you are playing from ‘C’ key but you want ‘C’ to sound like ‘B’ because your singer is singing from ‘B’ so you need to transpose to -1. The number range in this function is -12 to +12

We have used -1 because between ‘C’ and ‘B’ there is only gap of 1 semitone. We have used ‘–‘ sign because the note we want to be sounded like is 1 semitone below our current note. ‘B’ is below ‘C’.

If you want ‘C’ key to sound like ‘A’ note, we will transpose it to -3 because there is difference of 3 semitones and ‘A’ is below ‘C’.

If you ‘C’ to sound like ‘D’ note, we will transpose it to +2 because there difference of 2 semitones and ‘D’ is above ‘C’.

You just need to check difference between current note and the note you want it to sound like. If the note you want to sound like is below the current note ‘minus’ and if it is above ‘plus’.

Facial expression

Why it is important?

Facial expressions are important because it shows your confidence. If you are facial expressions are fearful just because you are scared to make mistake, the audience will sense it because somewhere deep inside they will be concerned about you too. If you are scared, they won’t be able to enjoy it.

How do you get good expression?

Simple answer is practice. If you are confident enough and if you have practiced enough then you know that you are not going to make any mistake and thus you will smile and enjoy it and so does the audience.

If your inclined towards not smiling much while concentrating then you need to practice the facial expressions because that is something which leaves an impact over the audience.

ALWAYS REMEMBER,

Good playing + Fearful/scared expression = only clapping

Good playing + Good expressions = Clapping + Appreciation + Connection

And from then onwards they will be your **fan**.

So, if you want them to be your fan, act like you know everything no matter how scared you are.

If you are scared and you make a mistake, you will be embarrassed

If you are enjoying and you make mistake, still you will be embarrassed but the audience will let it go because you have already made them smile by smiling at them.

THE CONCLUSION

If you are someone who has reached this page of the book with all the lessons followed, I salute you. This was the most comprehensive learning experience in piano world. Completing this course shows that you are truly a patient learner.

After this course, there is only one thing that you need to improve your piano skills and that is OBSERVATION. Piano is a topic of trends and it is highly depended on the music industry. So the way you play songs now will not be the way you will play after 2-3 years. The whole skill depends on what type of music you like and what is the current trend in the industry. As of now in 2023 when the book is being written, there is the trend of Lo-Fi music and I am sure that this will be different after few years.

This shows that you need to constantly keep improving yourself in terms of playing and in terms of learning. Here is where the observation comes into picture.

Piano is just matter of 12 notes and 10 fingers. You cannot go out of this in performing the skill. You just need to observe the artists who play piano and understand what notes they are using. Ask yourself, Can you do the same? If no, did you understand what has been played? If yes, then you just need to practice. If you didn't understand what has been played then you can ask an expert. You can always write us an email or contact us.

After completing this course when you see someone performing extraordinarily, do not feel that I have not been taught the same because the only reason of them playing in such a way is practice, observation and creativity. The core concepts and the topics will never become outdated. The only thing that will

become outdated would the style of playing it. Everyone has a different taste in music and everyone is different in terms of grasping power and learning. You just need to make sure that you observe what's new in the market and how can you apply the same.

If you are playing the same as you did last year, you are not learning. Even in 2023 my skills are different than 2022 and will be different in 2024. Just keep practicing and keep learning as it is just matter of 12 notes and 10 fingers.

Thank you everyone for your time and patience. Do let us know your feedbacks on our social media handles.
